The story of how Cuba came to be trapped

in automotive time is a fascinating one. For decades, the island country had enjoyed healthy tourism trade and American outpost status, and by the 1950s it had the highest per capita automotive purchasing of any Latin American country. But when Cuba fell to communist rebels in 1959, so ended the inflow of new cars. Since then, trade embargo forced Cuba's car enthusiasts to develop a unique and insular

culture, one marked by great creativity, such as:  
-Keeping a car alive with no opportunity to acquire replacement parts  
-Customizing a car with no access to aftermarket parts  
-Drag racing with no drag strip  
In many ways, Cuba is an automotive time warp, where the newest car is a 1959 Chevy or perhaps one of the Soviet Ladas. Cuba's Car Culture offers an inside look at a unique car culture, populated with cars that have
