Casting a Destiny CRC Press

Follow two abolitionists who fought one of the most shockingly persistent evils of the world: human trafficking and sexual exploitation of slaves. Told in alternating chapters from perspectives spanning more than a century apart, read the riveting 19th century first-hand account of Harriet Jacobs and the modern-day eyewitness account of Timothy Ballard. Harriet Jacobs was an African-American, born into slavery in North Carolina in 1813. She thwarted the

sexual advances of her master for years until she escaped and hid in the attic crawl space of her grandmother's house for seven years before escaping north to freedom. She published an autobiography of her life, *Incidents in the Life of a Slave Girl*, which was one of the first open discussions about sexual abuse endured by slave women. She was an active abolitionist, associated with Frederick Douglass, and, during the Civil War, used her celebrity to raise money for black refugees. After the war, she worked to improve the conditions of newly-freed slaves. As a former Special Agent for the Department of Homeland Security who has seen the horrors and carnage of war, Timothy Ballard founded a modern-day "underground railroad" which has rescued hundreds of children from being fully enslaved, abused, or trafficked in third-world countries. His story includes the rescue and his eventual adoption of two young siblings--Mia and Marky, who were born in Haiti. Section 2 features the lives of five abolitionists, a mix of heroes from past to present, who call us to action and teach us life lessons based on their own experiences: Harriet Tubman--The "Conductor"; Abraham Lincoln--the "Great Emancipator"; Little Mia--the sister who saved her little brother; Guesno Mardy--the Haitian father

who lost his son to slave traders; and Harriet Jacobs--a teacher for us all.

The Subtle Ruse Asmodee

"Company policy forbids me from exchanging my blood, my soul, or my firstborn child with customers..." When Ross starts working third-shift at a gas station, he doesn't think anything extraordinary will happen. He expects a lot of quiet shifts. Well, you know what they say about assumptions. One explosion later and he's the personal assistant to a vampire-who he admits is not only sexy, but the sane one-in charge of his supernatural clan's paperwork, and managing any trouble the members get into. Spoiler alert: the clan can get into quite a bit of trouble. Ross is definitely not paid enough for this. Tags: The crack ship armada sails again, and then it got out of hand, poor put upon retail workers, Ross didn't deserve this, Fate is cruel, so am I, the trauma of changing jobs, Ross has a paperclip and knows how to use it, Ross isn't clear if he's a PA, bartender, or babysitter, troublesome werewolves, Australian wizards, spells gone awry, very awry, sexy vampires, developing relationship, coming out, not a single degree of chill from Glenn where Ross is concerned, slow burn, boss/secretary, light bondage, Ross has to teach ancient mythical beings how to text, pray for him, SHENANIGANS, did I mention crack?, the most absurd workplace romance in history

Gas Dynamics (work Book) Good Press

A rapidly changing and expanding livestock and poultry production sector is causing a range of environmental problems on local, regional and global scales. Animal Manure Recycling: Treatment and Management presents an accessible overview of environmentally friendly technologies for managing animal manure more efficiently and in a sustainable manner. The book describes the physical and chemical characteristics of animal manure and microbial processes, featuring detailed examples and case studies showing how this knowledge can be used in practice. Readers are introduced to the sustainable use of animal manure for crop fertilisation and soil amelioration. Environmentally friendly technologies for reducing emissions of ammonia, odour and the greenhouse gases nitrous oxide and methane are presented, and reduction of plant nutrient losses using separation technologies is introduced. Finally and most importantly, the book describes methods to commercialise and transfer knowledge about innovations to end-users. Topics covered include: Regulation of animal manure management Manure organic matter: characteristics

and microbial transformations
Greenhouse gas emissions from
animal manures and technologies for
their reduction Technologies and
logistics for handling, transport
and distribution of animal manures

Most people know that there are
70 million Baby Boomers in
America today....but what is
less known is that there are
approximately 100 million
people in America between the
ages of 16 and 30. This
generation has just entered, or
will soon be entering the work
force. And they have no idea
how to invest, save, or handle
their money. Young people today
come out of school having had
little or no formal education
on the basics of money
management. Many have large
debts from student loans
looming over their heads. And
many feel confused and
powerless when their pricey
educations don't translate into
high paying jobs. They feel

that their \$30,000-\$40,000
salary is too meager to bother
with investing, and they
constantly fear that there will
be "too much month left at the
end of their money." Douglas R.
Andrew has shown the parents of
this generation a different
pathway to financial freedom.
Now Doug and his sons, Emron and
Aaron - both of whom are in
their mid-20s - show the
under-30 crowd how they can
break from traditional 401k
investment plans and instead can
find a better way by investing
in real estate, budgeting
effectively, avoiding
unnecessary taxes and using life
insurance to create tax-free
income. With the principles
outlined in Millionaire by
Thirty, recent graduates will be
earning enough interest on their
savings to meet their basic
living expenses by the time
they're 30. And by the time
they're 35, their investments
will be earning more money than
they are, guaranteeing them a
happy, wealthy future.

Pedigree Books Limited

This is the ninth in the 300
series of circuit design books,
again contains a wide range of
circuits, tips and design ideas.
The book has been divided into
sections, making it easy to find
related subjects in a single
category. The book not only
details DIY electronic circuits
for home construction but also
inspiring ideas for projects you
may want to design from the ground
up. Because software in general
and microcontroller programming
techniques in particular have
become key aspects of modern
electronics, a number of items in
this book deal with these subjects
only. Like its predecessors in the
300 series, "308 Circuits" covers
the following disciplines and
interest fields of modern
electronics: test and measurement,
radio and television, power
supplies and battery chargers,
general interest, computers and
microprocessors, circuit ideas and
audio and hi-fi.

Air and Gas Drilling Manual
Independently Published
To ensure product reliability, an organization must follow specific practices during the product development process that impact reliability. The second edition of the bestselling Product Reliability, Maintainability, and Supportability Handbook

helps professionals identify the shortcomings in the reliability practices of their organizations and empowers them to take actions to overcome them. The book begins by discussing product effectiveness and its related functions, presents the mathematical theory for reliability, and introduces statistical inference concepts as ways to analyze probabilistic models from observational data. Later chapters introduce basic types of probability distributions; present the concepts of confidence interval; focus on reliability assessment; and examine software reliability, quality, and safety. Use FMMEA to identify failure mechanisms Reflecting the latest developments in the field, the book introduces a new methodology known as failure modes, mechanisms, and effects analysis (FMMEA) to identify potential failure mechanisms. Shifting to a practical stance, the book delineates steps that must be taken to develop a product that meets reliability objectives. It describes how to combine reliability information from parts and subsystems to compute system level reliability, presents methods for evaluating reliability in fault-tolerant conditions, and describes methods for modeling and analyzing failures of repairable products. The text discusses reliability growth, accelerated testing, and management of a continuous improvement program; analyzes the influence of reliability on logistics support requirements; shows how to assess overall product effectiveness; and introduces the concepts of process capability and statistical process control techniques.

New Topics in the Second Edition Include: Failure Modes, Mechanisms, and Effects Analysis Confidence Interval on Reliability Metrics and their Relationships with Measures of Product Quality Process Control and Process Capability and their Relationship with Product Reliability System Reliability, including Redundancy
