This ethnographic case study is set within a collaborative research project in which teachers and researchers investigate early English as a Foreign Language (eEFL) tasks in theory and practice in German primary schools. Results are obtained through an interpretation of multiple sources within an interdiscursive, multi-perspectived research agenda. The results suggest that eEFL tasks can emerge during an interplay of four key teaching practices: doing school, providing space for learners to communicate, building a vocabulary and teaching the spoken language.

Why you need a writing revolution in your classroom and how to lead it *The Writing Revolution (TWR)* provides a clear method of instruction that you can use no matter what subject or grade level you teach. The model, also known as The Hochman Method, has demonstrated, over and over, that it can turn weak writers into strong communicators by focusing on specific techniques that match their needs and by providing them with targeted feedback. Insurmountable as the challenges faced by many students may seem, *The Writing Revolution* can make a dramatic difference. And the method does more than improve writing skills. It also helps: Boost reading comprehension Improve organizational and study skills Enhance speaking abilities Develop analytical capabilities *The Writing Revolution* is as much a method of teaching content as it is a method of teaching writing. There's no separate writing block and no separate writing curriculum. Instead, teachers of all subjects adapt the TWR strategies and activities to their current curriculum and weave them into their content instruction. But perhaps what's most revolutionary about the TWR method is that it takes the mystery out of learning to write well. It breaks the writing process down into manageable chunks and then has students practice the chunks they need, repeatedly, while also learning content.

The strict traditions of piano teaching have remained entrenched for generations. The dominant influence of Muzio Clementi (1752-1832), the first composer-pedagogue of the instrument, brought about an explosion of autocratic instruction and bizarre teaching systems, exemplified in the mind-numbing drills of Hanon's "The Virtuoso Pianist." These practices--considered absurd or abusive by many--persist today at all levels of piano education. This book critically examines two centuries of teaching methods and encourages instructors to do away with traditions that disconnect mental and creative skills.

*Designing Performance Assessment Systems for Urban Teacher Preparation* presents an argument for, and invites, critical examination of teacher preparation and assessment practices--in light of both the complexity and demands of urban settings and the theories of learning and learning to teach that guide teacher education practices. This dynamic approach distinguishes the authors' stance on urban teacher assessment as one that can help address social justice issues related to gender, race, socioeconomic class, and other differences, and at the same time promote the professional development of all educators engaged in the process of learning to teach. The contextually bound, sociocultural stance that informs this book promises greater teacher and student achievement. Culminating six years of vital dialogue and focused, local activity among teachers and teacher educators from institutions in the Urban Network to Improve Teacher Education, *Designing Performance Assessment Systems for Urban Teacher Preparation* presents: \*the historical context that was examined for this work, a theoretical framework to undergrad teacher preparation assessment, and design principles to guide the development of assessment systems; \*four case studies of participants' struggles and successes in designing and implementing these systems; and \*a discussion of the importance of context and current trends in assessment practices in urban teaching. This volume is particularly relevant for university and school-based teacher educators who help prepare teachers to work in urban schools, and for personnel in state departments of education and other agencies who are responsible for certification and beginning teacher support. While the focus is on preparing teachers for urban settings, the theoretical and practical foundations and the case studies have broad implications and provide useful insights for anyone involved in developing and using performance assessment systems--teacher educators, university and school administrators, classroom teachers, and educational researchers.
