In the late 1800s a supremely qualified woman educator and

administrator made an unforgettable imprint on well-known missionaries, educators, and preachers. Emma Dryer worked with Pacific Garden Mission's George and Sarah Clarke, Methodist deaconess Lucy Rider Meyer, Wheaton College President Charles Blanchard, Anna Spafford--whose husband wrote the beloved hymn It is Well with My Soul--and many

others. However, her greatest achievement came from her divinely guided association with evangelist Dwight L. Moody. Moody Bible Institute in Chicago, with its compelling and far-reaching ministries, would undoubtedly not exist today if not for the driving missionary fervor of Emma Dryer. Her story is finally being told in light of this association. A close examination

---

of her ministry relationship with Mr. Moody reveals the interconnected aspects of their lives from a viewpoint never before written. This includes examining their leadership styles and effectiveness in modern day terms as well as contrasting their learning styles, strengths, and weaknesses as both evangelist and educator. This book

represents the first biography of Emma Dryer's life with undying evidence of the answered prayers of a noble and virtuous woman who dedicated her life to serve and honor Christ until his eminent return. **Obligation for Justice Wolters Kluwer** Featuring more than five hundred questions from past Regents exams with worked out solutions and detailed illustrations, this book is integrated with

Hermann von Helmholtz was a towering figure of nineteenth-century scientific and intellectual life. Best known for his achievements in physiology and physics, he also contributed to other disciplines such as ophthalmology, psychology, mathematics, chemical thermodynamics, and meteorology. With Helmholtz:

A Life in Science, David Cahan has written a definitive biography, one that brings to light the dynamic relationship between Helmholtz's private life, his professional pursuits, and the larger world in which he lived. ? Utilizing all of Helmholtz's scientific and philosophical writings, as well as previously unknown letters, this book reveals the forces that drove his life—a passion to unite the sciences, vigilant attention to the sources and methods of knowledge, and a deep appreciation of the ways in which the arts and sciences could benefit each other. By placing the overall structure and development of his

---

scientific work and philosophy within the greater context of nineteenth-century Germany, Helmholtz also serves as cultural biography of the construction of the scientific community: its laboratories, institutes, journals, disciplinary organizations, and national and international meetings.

Helmholtz's life is a shining example of what can happen when the sciences and the humanities become interwoven in the life of one highly motivated, energetic, and gifted person.

The first part of her narrative emphasizes her efforts to

After two years at Albion College, she attended Boston Theological School (1876-1878) and accepted a pastorate in East Dennis, Cape Cod, after graduation; later she also took temporary charge of the Congregational Church in Dennis.
