The use of new media in the service of cultural heritage is a fast growing field, known variously as virtual or digital heritage. New Heritage, under this denomination, broadens the definition of the field to address the complexity of cultural heritage such as the

related social, political and economic issues. This book is a collection of 20 key essays, of authors from 11 countries, representing a wide range of professions including architecture, philosophy, history, cultural heritage management, new media, museology and computer science, which examine the application of new media to cultural heritage from a different points of view. On what basis are sibling relations made and negotiated and how do they change over time? How do siblings provide support, but also create pressure or conflict? Despite their importance as models for or contrasts to marriage, friendship, and nation, sibling relations have been largely ignored in anthropology. In this volume, the contributors provide a conceptualization of siblingship as shared parentage, exchange, and experience. They explore what

makes these relations worth maintaining and how they contribute to wider community processes, material support, and emotional connection. The ethnographic case studies provide detailed descriptions of lived sibling relations in various settings across the globe.

The artworks of the US artist Cy Twombly (1928-2011) are considered to be hermetic and inaccessible. Pencil scribbles, explosions of paint, tumbling lines, overlapping layers of color, and inscriptions, geometrical figures, numerals, rows of numbers, words, fragments of quotations, and enigmatic work-titles present very special challenges to both researchers and viewers. While art historians together with scholars of Egyptology, Archaeology, German, Greek, English, Japanese, and the Romance languages inquire into the relation between title, work, and inscribed quotations, leading representatives of research on Twombly focus on the visual language and scriptural-imagistic quality of Cy Twombly's work. Through comprehensive interpretations of famous single works and

groups in all the artistic media employed by Twombly, the volume's cross-disciplinary view opens up a route into the associative-referential visual language of Cy Twombly.

Eine Landschaft setzt sich aus vielen Einzelementen zu einem homogenen Ganzen zusammen. Bei der Landschaftsmalerei geht es darum, sich aus den Einzelementen gezielt einen Aspekt herauszusuchen, der dann den Akzent in dem in sich homogenen Gesamtbild bildet. Dies bedarf eines gewissen Abstraktionsprozesses, denn Abstraktion bedeutet die Reduktion auf das Wesentliche. Was aber ist das Wesentliche einer Landschaft und wie extrahiert man es? Bernd Klimmer stellt in diesem Band besonders beliebte europäische Landschaften vor und erklärt an

Landschaft wiedererkennbar erfasst und mit Hilfe von Acrylfarben, Strukturen und manchmal auch eigenwilligen Hilfsmitteln zu einem aussagekräftigen Bild komponiert. *Management of Art Galleries* Penguin
Hannah Arendt was born in Germany in 1906 and lived in America from 1941 until her death in 1975. Thus her life spanned the tumultuous years of the twentieth century, as did her thought. She did not consider herself a philosopher, though she studied and maintained close relationships with two great philosophers—Karl Jaspers and Martin Heidegger—throughout their lives. She was a thinker, in search not of metaphysical truth but of the meaning of appearances and events. She was a questioner rather than an answerer, and she wrote what she thought, principally to encourage others to think for themselves. Fearless of the consequences of thinking, Arendt found courage woven in each and every strand of human freedom. In 1951 she published *The Origins of Totalitarianism*, in 1958 *The Human Condition*, in 1961 *Between Past and Future*, in 1963 *On Revolution and Eichmann in Jerusalem*, in 1968 *Men in Dark Times*, in 1970 *On Violence*, in 1972 *Crises of the Republic*, and in 1978, posthumously, *The Life of the Mind*. Starting at the turn of the

twenty-first century, Schocken Books has published a series of collections of Arendt's unpublished and uncollected writings, of which *Thinking Without a Banister* is the fifth volume. The title refers to Arendt's description of her experience of thinking, an activity she indulged without any of the traditional religious, moral, political, or philosophic pillars of support. The book's contents are varied: the essays, lectures, reviews, interviews, speeches, and editorials, taken together, manifest the relentless activity of her mind as well as her character, acquainting the reader with the person Arendt was, and who has hardly yet been appreciated or understood. During the first two decades of the nineteenth century, two of the most significant theoretical works on color since Leonardo da Vinci's *Trattato della Pittura* were written and published in Germany: Arthur Schopenhauer's *On Vision and Colors* and Philipp Otto Runge's *Color Sphere*. For Schopenhauer, vision is wholly subjective in nature and characterized by processes that cross over into the territory of philosophy. Runge's *Color Sphere* and essay "The Duality of Color" contained one of the first attempts to depict a comprehensive and harmonious color system in three dimensions. Runge intended his color sphere to be understood not as a product of art, but rather as a "mathematical figure of various philosophical reflections." By bringing these two visionary color theories together within a broad theoretical context philosophy, art, architecture, and design this volume uncovers their enduring influence on our own perception of color and the visual world around us.
