It is clear to Shola that she is not, in fact, a dog. People may have been trying to tell her otherwise for dog years, but a trip to her owner's library finally has her convinced: she is, in fact, descended from the Kings of the Savannah. But how will she take to her new-found lineage? Will she finally get the respect she deserves from her fellow citizens? Most importantly, now that she has been identified as a powerful predator, does this mean no chips again... ever?

The Little Book of Saints Edwin Mellen Press
Learn about the lives and works of over eighty saints in this collection, featuring ninety-two colorfully illustrated holy cards. How does Saint Christopher keep us safe when we travel? Why

The perfect book for the devout or any religious occasion, this captivating collection recounts the extraordinary legends, heartrending stories, joys, and sorrows of the most beloved saints, from the famous to the mysteriously obscure. Beautifully illustrated with historical pictures from prayer books and missals, this elegant keepsake is a joy to have.

Why Johnny Still Can't Read OECD Publishing

This book considers the issues globalization raises for second language learning and teaching. Block and Cameron's collection shows how, in an economy based on services and information, the linguistic skills of workers becomes increasingly important. New

technologies make possible new kinds of language teaching, and language becomes an economic commodity with a value in the global marketplace. This has implications for how and why people learn languages, and for which languages they learn. Drawing together the various strands of the globalization debate, this rich and varied collection of contributions explores issues such as: *The commodification of language(s) and language skills *The use of new media and new technologies in language learning and teaching *The effects of globalization on the language teaching industry *New forms of power and resistance.

Educating Second Language Children

Open Road + Grove/Atlantic

Originally published in English in 1971, structuralism was an increasingly important method of analysis in disciplines as diverse as mathematics, physics, biology, psychology, linguistics, sociology, anthropology and philosophy. Piaget here offers both a definitive introduction to the method and a brilliant

critique of the principal structuralist positions. He explains and evaluates the work of the main people at work in the field - Claude Lévi-Strauss, Michel Foucault, Talcott Parsons, Noam Chomsky - and concludes that structuralism has a rich and fruitful future ahead of it. An indispensable work for serious students and working scholars in almost every field, the book is also an important addition to Piaget's life-long study of the relationship of language and thought.

The Work of Art and Its

Reproduction Europe Comics

"As early as 1839, the reproduction of art works was

regarded as a primary subject for photography. Far from being neglected by the pioneer photographers, it was a major stake for the most talented among them, from William Fox Talbot to Gustave Le Gray, Charles Marville and Pierre-Ambroise Richebourg. The marketing of photographic reproductions of art works from the 1850s onwards played a key role in the history of taste. A study of this genre long overlooked by historians proves to be highly rewarding."--BOOK JACKET.

The Wisdom of Matthew Capstone

A visceral space thriller—perfect for fans of *Arrival* and *The Martian*—following the sole survivor of a catastrophic accident in space that leaves her drifting in the void with only the voice of her estranged husband, a NASA scientist, to guide her back to Earth. Commander Maryam “May” Knox awakes from a medically induced coma alone, adrift in space on a rapidly failing ship, with little to no memory of who she is or why she’s there. Slowly, she pieces together that she’s the captain of the ship, *Hawking II*; that she was bound for Europa—one of Jupiter’s moons—on a research mission; and that she’s the only survivor of either an accident—or worse, a deliberate massacre—that has decimated her entire crew. With resources running low, and her physical strength severely compromised, May must rely on someone back home to help her. The problem is: everyone thinks she’s dead. Back on Earth, it’s been weeks since *Hawking II* has communicated with NASA, and Dr. Stephen Knox is on bereavement leave to deal with the apparent death of his estranged wife, whose decision to participate in the Europa mission strained their marriage past the point of no return. But when he gets word that NASA has received a transmission from May, Stephen comes rushing to her aid. What he doesn’t know is that not everyone wants May to make it back alive. Even more

Hieronymus Bosch (1450-1516) is, without any doubt, one of the most famous artists in the history of Netherlandish painting. This book explores his best-known paintings and drawings, showing them as

fantastic and monstrous. Readers are treated to an exceptional view of masterpieces like The Garden of Earthly Delights, The Haywain Triptych, The Temptation of St Anthony and The Seven Deadly Sins. Till-Holger Borchert, Director of the Bruges Museums and an expert on Netherlandish art, guides us through the painter's oeuvre in clear and accessible language, and from less familiar and surprising angles.

This text brings together the work of 15 elementary education experts who support an integrative approach to educating second language children. The paperback edition is a collection of articles from fourteen elementary education experts who espouse an integrative

approach to second language education - one that goes beyond language teaching methodology - to cover a wide range of issues affecting the academic and social success of language minority children. The volume deals not only with second language development, but with the development of the whole child. Rather than focusing on language instruction, it addresses the entire curriculum, and instead of restricting itself to classroom learning, it examines the role of the school, family, and community.

l'Hôpital Sainte-Justine

In contemporary philosophy, substantive moral theories are typically classified as either consequentialist or deontological. Standard consequentialist theories insist, roughly, that agents must always act so as to produce the best available outcomes overall. Standard deontological theories, by contrast, maintain that there are some circumstances where one is permitted but not required to produce the best overall results, and still other circumstances in which one is positively forbidden to do so. Classical utilitarianism is the most familiar consequentialist view, but it is widely regarded as an inadequate account of morality. Although

Professor Scheffler agrees with this assessment, he also believes that consequentialism seems initially plausible, and that there is a persistent air of paradox surrounding typical deontological views. In this book, therefore, he undertakes to reconsider the rejection of consequentialism. He argues that it is possible to provide a rationale for the view that agents need not always produce the best possible overall outcomes, and this motivates one departure from consequentialism; but he shows that it is surprisingly difficult to provide a satisfactory rationale for the view that there are times when agents must not produce the best possible overall outcomes. He goes on to argue for a hitherto

neglected type of moral conception, according to which agents are always permitted, but not always required, to produce the best outcomes.
