Philosophies and Theories for Advanced Nursing Practice, Second Edition was developed as an essential resource for advance practice students in master's and doctoral programs. This text is appropriate for students needing an introductory understanding of philosophy and how a theory is constructed as well as students and nurses who understand theory at an advanced level. The Second Edition discusses the AACN DNP essentials which is critical for DNP students as well as PhD students who need a better understanding of the DNP-educated nurse's role. Philosophies and Theories for Advanced Nursing Practice, Second Edition covers a wide variety of theories in addition to nursing theories. Coverage of non-nursing related theory is beneficial to nurses because of the growing national emphasis on collaborative,

interdisciplinary patient care. The text includes diagrams, tables, and discussion questions to help students understand and reinforce core content. *Advanced Practice Psychiatric Nursing* Springer

First edition won an AJN Book-of-the-Year Award and a Doody's 5-Star review! This core text for the DNP curriculum explores the historical and evolving advanced practice doctoral role as envisioned by leading DNP scholars and educators. Its distinctive point counterpoint format consisting of commentaries that dispute or support the opinions of chapter authors provides a foundation of varying opinions that stimulate vigorous critical dialogue. The second edition examines the latest developments in doctoral-level roles along with the specific skills that advance these roles. Seven completely new chapters examine the meaning of nursing roles that reflect how they are evolving in a variety of environments. In addition to exploring in-depth the basic roles of the DNP graduate, this new edition strengthens the primary DNP role that of a clinical scholar. Highlighting the diverse range of views on the DNP mission, the book reflects on DNP competencies and focuses heavily on the variety of skills that are required to operationalize these competencies, including leadership, negotiation skills, leveraging technology to support practice, and others. New critical thinking exercises are included that are designed to expand the boundaries of ordinary classroom discourse. New to the Second Edition: New chapters include: A Report on a National Study of Doctoral Nursing Faculty When the DNP Chair Is a DNP Graduate A Critique of the 2006 Essentials of Doctoral Education for Advanced Nursing Practice New or enhanced reflective responses from leading scholars New or revised critical thinking exercises to foster vibrant discourse Key Features: Emphasizes DNP role development with extensive contributions by leading DNP scholars Translates American Association of Colleges of Nursing core competency skills into real-life

A robust collection of practice-focused case studies address current issues in the evolving nursing profession, targeting concerns of the advanced practice nurse.

*Strategic Planning for Advanced Nursing Practice* Springer Publishing Company

Functioning as both a graduate textbook and a professional resource, *Role Development for Doctoral Advanced Nursing Practice* explores the historical and evolving role of the doctorally-prepared Advanced Practice Registered Nurse (APRN). Because the role of the DNP graduate is evolving, the primary authors and contributing authors of this text present positions and reflective responses that represent a diverse range of current views on the DNP role and the diverse 'ideals' of what the role of the doctorally-prepared APRN should be. This is also the first text to market that exclusively examines the evolving and expanding role functions of the DNP graduate. Too often, nursing texts offer the sole view of the author. This one uniquely does not. The highlight of this text is the two-part chapter organization that presents the chapter content followed by a Reflective Response, which is commentary that may counter or support the opinions of the chapter author. Each Reflective Response is written by well-known DNP leaders representing the diverse roles and experience of academics, administrators and practitioners. This innovative chapter presentation is bound to provide for more stimulating classroom discussion. This work is stimulating and possibly provocative, but in the end is a well-rounded, landmark presentation of a wide range of topics surrounding education of the DNP, the core competencies and the unfolding DNP role

development. It is a 'must have' text for use in all DNP role development courses and courses covering contemporary DNP degree issues! Each of the textbook's sections thoroughly covers important aspects of role development: Section I: provides background information on the evolution of the DNP degree; essential content on role theory; what nursing "roles" are and how they evolved; and a discussion of how masters versus doctoral level advanced nursing practices differ Section II: focuses on the four basic roles of the DNP graduate which currently predominate: practitioner, clinical executive, educator, and clinical trials research scientist, as well as the role of the clinical scholar which each graduate is expected to be Section III: covers the diverse skills that comprise the doctoral APRN role; including leadership content, negotiation skills, and leveraging technology to support doctoral advanced level practice; debate over the DNP Exam; discussion of DNP grads using the title "Dr"; and how the doctoral APRN can use their new competencies to function at a higher level
