This new edition serves both as a reference guide for the experienced professional and as a preparation source for those desiring certifications. It's an invaluable resource and a must-have addition to every safety professional's library. *Safety Professional's Reference and Study Guide, Third Edition*, is written to serve as a useful reference tool for the experienced practicing safety professional, as well as a study guide for university students and those preparing for the Certified Safety Professional examination. It addresses major topics of the safety and health profession and includes the latest version of the Board of Certified Safety Professional (BCSP) reference sheet, a directory of resources and associations, as well as state and federal agency contact information. Additionally, this new edition offers new chapters and resources that will delight every reader. This book aids the prospective examination candidate and the practicing safety professional, by showing them, step-by-step, how to solve each question/formula listed on the BCSP examination and provide examples on how and when to utilize them.

As a result of a rigorous, methodical process that (ISC) follows to routinely update its credential exams, it has announced that enhancements will be made to both the Certified Information Systems Security Professional (CISSP) credential, beginning April 15, 2015. (ISC) conducts this process on a regular basis to ensure that the examinations and

Safety Professional's Reference and Study Guide, Third Edition ASD Publications, Pune, India

"As a young man, my fondest dream was to become a geographer. However, while working at the customs office, I thought deeply about the matter and concluded it was far too difficult a subject. I then turned to Physics as a substitute." Albert Einstein, great scientist is reported to have said in despair about Geography. The present series aptly titled "Geography Made Simple" is our humble attempt at removing fear of Geography subject from minds of students by presenting books that are written in lucid, simple and easy-to-understand language. The present eBook in full colours caters to needs of students of as diverse a field as Economic Geography, International Trade, Management, Economics, Political Economy, Commerce, Industrial Geography, Regional planning and development, International Business Management, Foreign Trade, International Finance, Trade and Transport Geography, etc. This evergreen book has stood the test of time since its first edition was published in October, 2002. This book is recommended as a reference-book by Geography teachers and used as a text-book by undergrads and postgraduate students even today. This second edition carries a 'Preface' by Jaiprakash Jadhav, Head of Geography Department, Dr. D. Y. Patil Arts, Commerce & Science College, Pimpri in Pune, India. Praise for Geography, Economics & Economic Geography "Hello, Parmar! Thanks for introducing the book of Economic Geography. I got it from my friend. I am modern college student of MA. I am Ram Shripati Payal." -Ram Shripati Payal, student of Modern College, Pune "Hi there! I just clicked on the website where your book will appear next month. I will try to do it next month...as I'm teaching Economic Geography in the fall at CWU. I haven't used a text in a couple of years because I didn't like any on the market. Thanks for your help!" -Ms Nancy, Central Washington University Jaiprakash Jadhav, Head of Geography Department, Dr. D. Y. Patil Arts, Commerce & Science College, Pimpri had presented in 2003 a few hardcopies of this eBook to the members of national accreditation agency, the National Assessment and Accreditation Council (NAAC) as the evidence of high quality of education at the College. He later personally acknowledged before Sher Singh Parmar that outstanding quality of his book made NAAC give a higher credible rating to Geography Department, Dr. D. Y. Patil Arts, Commerce & Science College. Noteworthy Features Possibly until the publication of the second edition of the book "Geography, Economics and Economic Geography" by Sher Singh Parmar in October, 2003, the Indian intelligentsia, Indian and the world mass media had not attributed the liberalization of the Indian economy to the Balance-of-Payment Crisis that India had faced in the year 1991. It was possibly for the first time in the world that this second edition by Sher Singh Parmar correctly pointed out, described and explained the balance-of-payment crisis faced by the Indian government in 1991 to be the main cause that had forced India into adopting the liberalization-mode for the Indian economy. The book contains for the first time many of the Economic terms/jargons that have been rephrased/paraphrased/elaborated/redefined/repurposed to make these Economic terms inclusive, better and more understandable. For example, see following definition of the term Trade included in this e-book: "10.2 BASIC CONCEPTS 1. TRADE: Exchange of goods, services or information." The definition of TRADE given above by Sher Singh Parmar is more inclusive than the following definition of TRADE that had been given until then in numerous Standard Texts/Books on subject of Economics: "TRADE: Exchange of goods" The book introduces altogether new fresh concepts called idealised perfectly balanced pentagonal model and realistic isostatically balanced amorphous model to understand economic landscapes. Author applies these two economic models to real life situations past and present to successfully build his thesis that "...even a slight imbalance in economic landscapes at any level is sufficient enough to engineer political and other problems. World peace may be achieved if the whole globe is developed into a perfectly balanced economic landscape." He brings in new insight to understand and appreciate dignity of labour in light of these new concepts. This new conceptual framework introduced by author definitely helps us understand and resolve present day problems in much better and peaceful ways. The book introduces new concepts of Economic Liberalization Model, Four Stages of Globalization model, and Tricellular LPG model. These models give us fresh incisive insight into vexing issues of Globalization, Liberalization, and Privatisation. Worth mentioning also is author's creative description, elaboration, and explanation of factors of international trade and business.

Guaranteed to boost test scores and grades. The essentials of this branch of mathematics are an important foundation that future more advanced math is built upon. Using this as a review and reinforcement tool is quick and easy to do daily or weekly, keeping all concepts fresh once you move deeper into the

subject. For complete coverage, get the Geometry Part 2 QuickStudy guide and use the two guides to study, reference, review and ace the grade. 6-page laminated guide includes: Geometric Formulas Undefined Terms Defined Terms Space Shapes Lines Planes Line Segments Rays Angles Suggested uses: Quick Reference - instead of digging into the textbook to find a core answer you need while studying, use the guide to reinforce quickly and repeatedly Memory - refreshing your memory repeatedly is a foundation of studying, have the core answers handy so you can focus on understanding the concepts Test Prep - no student should be cramming, but if you are, there is no better tool for that final review

Cornell Extension Bulletin Pearson Education

Pass the LEED AP BD&C Exam, Get Your Building LEED Certified, Fight Global Warming and Save Money! The USGBC released LEED v4 in GreenBuild International Conference and Expo in November, 2013. The GBCI started to include the new LEED v4 content for all LEED exams in late Spring 2014. We have incorporated the new LEED v4 content in this book. Starting on December 1, 2011, GBCI began to draw LEED AP BD+C Exam questions from Green Building and LEED Core Concepts Guide. We have also incorporated the latest information from this book. LEED (Leadership in Energy and Environmental Design) is one of the most important trends in development and is revolutionizing the construction industry. It has gained tremendous momentum and has a profound impact on our environment. From this book, you will learn how to: 1. Pass the LEED AP BD+C Exam. 2. Register and achieve LEED certification for a building. 3. Understand the intent of each LEED prerequisite and credit. 4. Calculate points for LEED credits. 5. Identify the credit path, submittal requirements, synergies, possible strategies and technologies, project phase, LEED submittal phase, and responsible party for each prerequisite and credit. 6. Earn extra credit (exemplary performance) for LEED. 7. Implement the related codes and standards. 8. Obtain points for categories not yet clearly defined by the USGBC. Most of the existing books on LEED and the LEED exams are too expensive and complicated to be practical or helpful. This guide fills in the blanks and demystifies LEED. It uncovers the secrets, codes, and jargon for LEED as well as the true meaning of "going green." It provides a solid foundation and fundamental framework for LEED. It covers every major aspect of LEED in plain and concise language, and introduces it to ordinary people. This guide is easy to carry around. You can read it whenever you have a few extra minutes. It is an indispensable book for ordinary people, developers, brokers, contractors, administrators, architects, landscape architects, engineers, interns, drafters, designers, and other design professionals. What others are saying about LEED BD&C Exam Guide ...

"Passed on first try, only used this guide" "This is the best study guide HANDS DOWN. If you're serious about passing the LEED AP BD&C exam on your first try, this is the one you've been looking for! I bought Mr. Chen's LEED Green Associate Exam Guide 2 months ago and passed it on the first try as well. I purchased the USGBC reference guide and Mr. Chen's LEED BD&C Exam Guide. I never opened the USGBC reference guide, only studied from Mr. Chen's study guide. I followed Mr. Chen's instructions and studied the guide for 2 weeks (yes, I have a full-time job). I did ignore the mnemonics, not my learning style (makes it more confusing to me). The exam was not easy, but I prepared and stuck to this material. I am not a good test taker by no means. I reviewed the technical data of the guide about 6 times and ignored everything else I had read or heard about the exam. Here's a piece of advice that I picked up from this book, spend less time on practice tests and more time studying! I have a subscription to a web exam simulator (rated the best) and only did about 100 questions, until I realized that I was wasting my valuable time. Find a good book and stick to it. This is also a great reference guide to use on everyday projects. Review the material, try to understand it, then try to memorize it through repetition. I would like to shake your hand and say THANKS AGAIN MR. GANG CHEN !!!" —LOBO "Excellent Guide and Good Manual" "I passed the LEED AP BD+C and the LEED AP ID+C exams this year and Gang Chen's books were my primary study material! The books are easy to read and use. Gang Chen provides study hints and guidance as well as an outline format that makes it easy for the reader to grasp key points. He also provides an excellent review of the entire accreditation process which can save people time in personal research. The books are more than study guides; they are helpful as reference manuals because of the easy to follow format. Definitely a keeper in my bookshelf for future project reference." —Karen M. Scott "Great resource for studying for the LEED Exam!" "I have taken and passed the LEED AP BD+C exam and know what it takes. As this author says, it's not an easy exam and he is right. What is critical to passing is having great teaching tools and this book is one of them. He touches on every aspect of how to memorize data, how questions are formed, what to expect on tricky questions, the content the test writers are looking for and every little detail you need to know when preparing for this exam. I highly recommend this author's books if you are serious about passing any of the LEED exams, hopefully on the first try!" —S. Jennifer Sakiewicz "LEED BD & C Exam Study Guide" "Gang Chan's study guide is an excellent resource in preparing to take the LEED AP BD+C exam particularly if one follows the study recommendation made in the guide. It does not replace the LEED Reference manual as the

definitive source for technical information but more importantly provides a structure for the study of the information that is easily understood and when followed should provide good assurance of success in passing the exam the 1st time. This is a 'keeper!' —Spock “ Good summary of information to memorize for the test “ Chen's exam guide is a good summary of the test relevant information in the LEED reference guide. He underlines specific information that is important to commit to memory for the test. It is a good way to understand which information needs to be strictly memorized if you are preparing for the test in a short amount of time and have a good understanding of the LEED process through your professional experience. I passed the test with a very high score on my first try, and I did use this guide, one other, the LEED reference manual, online sources, a class, and many years of personally working on and completing online LEED submittals through my work. The week before taking the test I used it to commit point values and those kind of details to memory... ” —Denver “ Not a bulky ref guide “ LEED BD&C Exam Guide does a great job in highlighting and summarizing the key points and concepts in USGBC ref guide. If you only have limited amount of time for LEED AP BD+C exam preparation, definitely go for this book. ” —Metcalf “ Very valuable guide! “ I am a lighting designer and am preparing to take the LEED BD+C exam...I got LEED BD&C Exam Guide to prepare for the LEED AP BD+C Exam and it was fairly well organized to help me refresh my memory on the background LEED knowledge I had. All the specifics that one needs to know about each credit such as the Purpose of the credit, Credit path, Submittals, Strategies and technologies etc, are clearly organized for every credit. In addition the author also employs the smart technique of Mnemonics which helps in memorizing the vast amount of information in a simplified manner. ” —Visswapriya Prabakar “ Immensely valuable and utterly to the point, a true must have! “ This is an excellent publication by Gang Chen that outlines precisely all the key points one need for success. I personally appreciate the easy to adopt memorization technique offered by the author. Practice exams are very comprehensive yet summarized and not to mention highly effective learning tool as it is designed in this book. It is a very delightful experience for me to have this outstanding publication. In a word, this definitely worth the money and for me it turns out extraordinarily helpful. ” —Shanaz, who passed LEED AP BD+C Exam on the first try “ Very Helpful! “ I found LEED BD&C Exam Guide to be very detailed and very helpful. I plan to take the exam soon, and I feel fully prepared for it. ” Yousuf Asadzoi “ Good book! “ I had appeared for GA and passed. I loved the content and the underlined highlights. I read your book; it gave me insight and knowledge on how credits are applied. Some questions in your book helped me answer ones on the test. Good book, I'll go through it once again when I appear for AP. ” —Haresh Vibhakar, AIIA (India), AIA, LEED Green Associate, Architect “ A good outline “ The book is an excellent outline to learn the necessary items required to study for the exam. It is not a comprehensive study guide in and of itself. Practice exam is good indicator of test preparation. ” —Paul Levine “ Solid LEED Study Guide “ This is the kind of book I wish was available when I did my original LEED AP exam. It teaches you how to study, which is so important when school is a distant memory. The bulk of the book helps you review and memorize with mnemonics the concepts for each credit that you need to know for the exam. The questions are good representations of questions on the exam. I would recommend to anyone studying for their exam, that they: - First read the chapters in this book on how to study; - Second read the actual LEED BD+C guide to give you the background information on the credits and gain comprehension. Underline and review as the author indicates to get the most out of your study time. - Finally read the rest of this exam guide to help you review and memorize for the exam. ” —missfitz "missfitz" “ Very Helpful Guide “ Gang Chen's LEED BD&C Exam Guides very helpful in consolidating information from USGBC and GBCI sources as well as providing the information that is necessary for the exam without excess irrelevant information. I highly recommend this book for preparation for the LEED BD+C exams. ” —leedap

Learning and Memory: A Comprehensive Reference, Second Edition is the authoritative resource for scientists and students interested in all facets of learning and memory. This updated edition includes chapters that reflect the state-of-the-art of research in this area. Coverage of sleep and memory has been significantly expanded, while neuromodulators in memory processing, neurogenesis and epigenetics are also covered in greater detail. New chapters have been included to reflect the massive increase in research into working memory and the educational relevance of memory research. No other reference work covers so wide a territory and in so much depth. Provides the most comprehensive and authoritative resource available on the study of learning and memory and its mechanisms Incorporates the expertise of over 150 outstanding investigators in the field, providing a ' one-stop ' resource of reputable information from world-leading scholars with easy cross-referencing of related articles to promote understanding and further research Includes further reading for each chapter that helps readers continue their research Includes a glossary of key terms that is helpful for users who are unfamiliar with neuroscience terminology

American Reference Books Annual Libraries Unlimited

Each chapter or module of this book includes a unique pattern of creating understanding of the content followed by sample questions to evaluate the learning. In case of techniques there are enough examples to understand and evaluate the techniques. To remember better, the important terms are represented in boxes separately with their meaning and definition, which is easy for a quick review. The book also includes a glossary at the end and mock assessment for practice. Finally, the book uses a self-explanatory and narrative language to create much better understanding for the aspirants and help them to pass the exam with proper knowledge to implement best practices and their work as well. Each topic comes with assistive video tutorial. A unique QR code is available for each topic. Just scan the QR code to navigate to the supporting video tutorial to understand the content better.

This book contains the proceedings of the The 5th Annual International Seminar on Trends in Science and Science Education (AISTSSE) and The 2nd International Conference on Innovation in Education, Science and Culture (ICIESC), where held on 18 October 2018 and 25 September 2018 in same city, Medan, North Sumatera. Both of conferences were organized respectively by Faculty of Mathematics and Natural Sciences and Research Institute, Universitas Negeri Medan. The papers from these conferences collected in a proceedings book entitled: Proceedings of 5th AISTSSE. In publishing process, AISTSSE and ICIESC were collaboration conference presents six plenary and invited speakers from Australia, Japan, Thailand, and from Indonesia. Besides speaker, around 162 researchers covering lecturers, teachers, participants and students have attended in this conference. The researchers come from Jakarta, Yogyakarta, Bandung, Palembang, Jambi, Batam, Pekanbaru, Padang, Aceh, Medan and several from Malaysia, and Thailand. The AISTSSE meeting is expected to yield fruitful result from discussion on various issues dealing with challenges we face in this Industrial Revolution (RI) 4.0. The purpose of AISTSSE is to bring together professionals, academics and students who are interested in the advancement of research and practical applications of innovation in education, science and culture. The presentation of such conference covering multi disciplines will contribute a lot of inspiring inputs and new knowledge on current trending about: Mathematical Sciences, Mathematics Education, Physical Sciences, Physics Education, Biological Sciences, Biology Education, Chemical Sciences, Chemistry Education, and Computer Sciences. Thus, this will contribute to the next young generation researches to produce innovative research findings. Hopely that the scientific attitude and skills through research will promote Unimed to be a well-known university which persist to be developed and excelled. Finally, we would like to express greatest thankful to all colleagues in the steering committee for cooperation in administering and arranging the conference. Hopefully these seminar and conference will be continued in the coming years with many more insight articles from inspiring research. We would also like to thank the invited speakers for their invaluable contribution and for sharing their vision in their talks. We hope to meet you again for the next conference of AISTSSE.
