'eMarketing eXcellence' offers an exciting new approach to help you build a customer-driven e-business. As the core text for the CIM's E-marketing award, the book offers a highly structured and accessible guide to a critical subject, providing a useful reference point for all students and managers involved in marketing strategy and implementation. A practical guide to creating and executing e-marketing plans, this book combines established approaches

to marketing planning with the creative use of new e-models and e-tools. It is designed to support both marketers who are integrating e-marketing into their existing marketing and communications strategies and experienced e-marketers looking to optimise their e-marketing. The book shows how to:

- Draw up an outline e-marketing plan
- Evaluate and apply e-marketing principles & models
- Integrate online and offline communications
- Implement customer-driven e-marketing
- Reduce costly trial and error
- Measure and enhance your e-marketing

Drive your e-business forward As the core text for the CIM's new professional E-marketing Award, it provides comprehensive, critical coverage of the key areas of e-marketing planning for marketing professionals. Established marketing concepts such as customer relationship management, the marketing mix and the widely adopted SOSTAC® planning system, are re-examined in the new media context - and new approaches are defined, including business models, traffic building and web site design.

(Nonfiction) A 2017 Washington Post Notable Book A Kirkus Best Book of 2017 "Butler has hit his stride. This is a meditation, a sonnet, a legal brief, a poetry slam and a dissertation that represents the full bloom of his early thesis: The justice system does not work for blacks, particularly black men." —The Washington Post "The most readable and provocative account of the consequences of the war on drugs since Michelle Alexander's *The New Jim Crow* . . ." —The New York Times Book Review "Powerful . . . deeply informed from a legal standpoint and yet in some ways still highly personal" —The Times Literary Supplement (London) With the eloquence of Ta-Nehisi Coates and the persuasive research of Michelle Alexander, a former federal prosecutor explains how the system really works, and how to disrupt it Cops, politicians, and ordinary people are afraid of black men. The result is the Chokehold: laws and practices that treat every African American man like a thug. In this explosive new book, an African American former federal prosecutor shows that the system is working exactly the way it's supposed to. Black men are always under watch, and police violence is widespread—all with the support of judges and politicians. In his no-holds-barred style, Butler, whose scholarship has been featured on 60 Minutes, uses new data to demonstrate that white men commit the majority of violent crime in the United States. For example, a white woman is ten times more likely to be raped by a white male acquaintance than be the victim of a violent crime perpetrated by a black man. Butler also frankly discusses the problem of black on black violence and how to keep communities safer—without relying as much on police. Chokehold powerfully demonstrates why current efforts to reform law enforcement will not create lasting change. Butler's controversial recommendations about how to crash the system, and when it's better for a black man to plead guilty—even if he's innocent—are sure to be game-changers

in the national debate about policing, criminal justice, and race relations.

"THE CODE OF LEKE DUKAGJINI is a great cultural treasure, comparable to the chapters of The Old Testament." "It provides deep insights into the ancient society of the Albanians, their somber dignity & their magnificent sense of honor."--David Binder, The New York Times. "This legal system was established & passed on to future generations as a common law by Leke Dukagjini, a co-fighter of the legendary Skenderbeg." "The 'Besa' or the 'word of honor' as stated in THE CODE OF LEKE DUKAGJINI which means peace & protection to those whom it is given, has become today an important fighting tool in the political struggle of Kosovo's Albanians against Serb oppression."--Victor Meier, The Frankfurter Allgemeine Zeitung. "The legal Code of the Albanians known by them for a thousand years, is one of the most original in the history of mankind. Among the basic pillars of this code are the equality of men before the code & the non-abuse of justice." "The entire essence of the legal code of the Albanians is an unparalleled rigorous respect for this basic principle: non-violation of the dignity of a man- his honor, home, & life."--Ismail Kadare, Albanian writer.

"[This book provides a] history of special prosecutors in American politics. For more than a century, special prosecutors have struck fear into the hearts of presidents, who have the power to fire them at any time. How could this be, [the author] asks? And how could the nation entrust such a high responsibility to such subordinate officials? [The author] demonstrates that special prosecutors can do much to protect the rule of law under the right circumstances. Many have been thwarted by the formidable challenges of investigating a sitting president and his close associates; a few have abused the

powers entrusted to them. But at their best, special prosecutors function as catalysts of democracy, channeling an unfocused popular will to safeguard the rule of law. By raising the visibility of high-level misconduct, they enable the American people to hold the president accountable. Yet, if a president thinks he can fire a special prosecutor without incurring serious political damage, he has the power to do so. Ultimately, [the author] concludes, only the American people can decide whether the President is above the law."--

What are the key factors that affect political trust in a transitional democracy? This question is at the core of the scholarly academic book, Political Trust in Kosovo: Examining Cultural and Institutional Dynamics. This book emerges from a 10-year scientific study, conducted from field research of the political elite and experts in Kosovo. The study uses two original datasets dating from 2012-2013 survey (220 participants) and 2017-2018 survey (40 participants). In this book, Dr. Babamusta dives into trust perceptions across different political-legal institutions and actors, including the Kosovo Specialist Court, the U.S. Embassy in Kosovo, NATO, the United Nations, the European Union, Kosovo police and legal system, and media/TV. Low levels of political trust pose a serious threat to democracy. A certain degree of trustworthiness in institutions is a necessary precondition for the legitimacy, fairness, and democratic governance. Therefore, trust in political institutions is vital to the democratic functioning of the state. The findings show that at the macro level the functioning of democracy and political institutions matter to political trust.

Bribery by international firms in OECD countries is more pervasive in public procurement than in the utilities, taxation or judicial sectors. Whilst most international efforts to fight corruption have focused exclusively on the bidding process, recent corruption scandals have highlighted grey areas throughout the whole public procurement cycle, including in needs assessment and contract management. This publication draws on the

experience of procurement practitioners as well as audit, competition and anti-corruption specialists, and sets out a comparative overview of practices designed to enhance integrity throughout the whole procurement cycle, with examples from OECD and non-OECD countries.

This report presents the recommendations of the WHO Expert Committee responsible for updating the WHO Model Lists of Essential Medicines.. The goal of the meeting was to review and update the 18th WHO Model List of Essential Medicines (EML) and the 4th WHO Model List of Essential Medicines for Children (EMLc). In accordance with approved procedures, the Expert Committee evaluated the scientific evidence on the basis of the comparative effectiveness, safety and cost effectiveness of the medicines. Both lists went through major revisions this year, as the Committee considered 77 applications, including 29 treatment regimens for cancer, and innovative hepatitis C and tuberculosis (TB) medicines. The Expert Committee recommended the addition of 36 new medicines to the EML (15 to the core list and 21 to the complementary list); and recommended the addition of 16 new medicines to the EMLc (five to the core list and 11 to the complementary list). Annexes to the main report include the revised version of the WHO Model List of Essential Medicines (19th edition) and the WHO Model List of Essential Medicines for Children (5th edition). In addition there is a list of all the items on the Model List sorted according to their Anatomical Therapeutic Chemical (ATC) classification codes.

This book considers local autonomy, measured as a multidimensional concept, from a cross-country comparative perspective, and examines how variations can be explained and what their consequences are. It fills a gap in the literature by providing a comprehensive study of the different components of local autonomy across a large number of countries, over time. It offers a theoretically saturated concept to measure local autonomy and applies it to 39 countries, including all 28 EU member states together with Albania, Georgia, Iceland, Liechtenstein, Macedonia, Moldova, Norway, Serbia, Switzerland Turkey and Ukraine, over a period of 25 years (1990-2014).

In 1949, a small book had a big impact on education. In just

over one hundred pages, Ralph W. Tyler presented the concept that curriculum should be dynamic, a program under constant evaluation and revision. Curriculum had always been thought of as a static, set program, and in an era preoccupied with student testing, he offered the innovative idea that teachers and administrators should spend as much time evaluating their plans as they do assessing their students. Since then, *Basic Principles of Curriculum and Instruction* has been a standard reference for anyone working with curriculum development. Although not a strict how-to guide, the book shows how educators can critically approach curriculum planning, studying progress and retooling when needed. Its four sections focus on setting objectives, selecting learning experiences, organizing instruction, and evaluating progress. Readers will come away with a firm understanding of how to formulate educational objectives and how to analyze and adjust their plans so that students meet the objectives. Tyler also explains that curriculum planning is a continuous, cyclical process, an instrument of education that needs to be fine-tuned. This emphasis on thoughtful evaluation has kept *Basic Principles of Curriculum and Instruction* a relevant, trusted companion for over sixty years. And with school districts across the nation working feverishly to align their curriculum with Common Core standards, Tyler's straightforward recommendations are sound and effective tools for educators working to create a curriculum that integrates national objectives with their students' needs.

Ethics in Public Service for the New Millennium The New Press

From an award-winning civil rights lawyer, a profound challenge to our society's normalization of the caging of human beings, and the role of the legal profession in perpetuating it Alec Karakatsanis is interested in what we choose to punish. For example, it is a crime in most of America for poor people to wager in the streets over dice; dice-wagerers can be seized, searched, have their assets forfeited, and be locked in cages. It's perfectly fine, by contrast, for people to wager over international currencies, mortgages, or the global supply of wheat; wheat-wagerers become names on the wings of hospitals and museums. He is also troubled by how the legal system works when it is trying to punish people. The bail system, for example, is meant to ensure that people return for court dates. But it has morphed into a way to lock up poor people who have not been convicted of anything. He's so concerned about this that he has personally sued court systems across the country, resulting in literally tens of thousands of people being released from jail when their money bail was found to be unconstitutional. Karakatsanis doesn't think people who have gone to law school, passed the bar, and sworn to uphold the Constitution should be complicit in the mass caging of human beings—an everyday brutality inflicted disproportionately on the bodies and minds of poor people and people of color and for which the legal system has never offered sufficient justification. *Usual Cruelty* is a profoundly radical reconsideration of the American "injustice system" by someone who is actively, wildly successfully, challenging it.
