Connoisseurs of world literature need to spend some time acquainting themselves with the Divan of Hafiz, one of the foremost collections of Persian verse. Scholars agree this volume has exerted a singularly important influence on Middle Eastern culture, akin to Shakespeare's role in the sphere of Western letters.

In 1979, there were fewer than 500 known Christians from a Muslim background in Iran. Today there are at least 100,000 believers . Church leaders believe that millions can be

added to the church in the next few years ' such is the spiritual hunger that exists. The religious violence that accompanied the reign of President Ahmadinejad drained its perpetrators of political and religious legitimacy, and has opened the door to other faiths. This book sets the rapid church growth in Iran in the context of the deteriorating relationship between Iranians and their national religion. There is a major focus on the Ahmadinejad years, but the author also covers the history of the church before 1979, picking up on the central idea that the spark may have become buried in the ashes but has never been extinguished. The book is careful, proportionate, well-informed and accurate. Throughout the text there will be boxes with stories of faith, persecution, and encouragement.

Tracing words to their origins opens a new window to human civilization and culture and helps us understand the roots of some of our

present social trends and attitudes. For example, the etymology of words for family members clearly shows the division of responsibilities in the most basic unit of society - the family. Father was the "protector" (Pa: protect), mother was the "feeder" (Ma: breast), brother was the load "carrier" (Bher: carry) and daughter was the "milker" (Dhugh: to milk). If one makes the effort to read beyond the shallow shell of sounds and symbols, one can recognize our human oneness portrayed in our words and their historical roots. The primary motivation for writing this dictionary is the hope that it would foster a greater appreciation for the commonality in the apparent variance among different languages and cultures, and ultimately nurture a greater understanding among those who speak apparently different languages. In tracing any Persian word to its origins, its cognates in other Indo-European

languages must be considered. In this dictionary, English cognates are regularly referred to along with some other Indo-European equivalents. Altogether, over 1,600 roots and 17,400 derived words are presented in this dictionary. One of the most unique features of this dictionary is its graphical presentation of etymological data, similar to a family tree. The derivations of words are indicated with arrows rather than lengthy text. The arrows greatly simplify the process of tracing words to their roots.

About These Crazy Nights, Moniro Ravanipour writes: "In 1981, less than three years after the Islamic Revolution in Iran, and in the heat of the Iran-Iraq War, I had become a night nurse in a hospital in Tehran, where every night I witnessed the arrival of the soldiers wounded on battlefronts. It was in the course of those nights that I also witnessed endless arguments and debates among patients with different ideologies and beliefs, including leftists, monarchists, nationalists, and staunch supporters of the new Islamic regime. Late at night, when the hospital ward was quiet, the

patients would come and tell me stories about the battlefronts and their lives. The initial chapters of this novel, which was shaping in my mind at the time, were written in Iran and the concluding chapters were completed in the United States." This is a novel about the author's life, first in Iran and later as a refugee and immigrant in the United States. It is an important novel to be made available in English, especially in a country made up of immigrants, and in particular at this time. It tells us, in fact it actually shows us, why so many people around the world, whether from the Middle East, South

America, or elsewhere, are inclined to leave their ancestral land, their hearth and home, and try, despite all the odds and obstacles, to take refuge to the land of the free.

This comprehensive volume offers a detailed overview of the principle languages which make up this group: Old Iranian, Middle Iranian, and New Iranian. The liberalization of political and intellectual life in China and the rise of Tibetan exile communities throughout the world have produced a resurgence of spoken and written Tibetan. These developments, together with increasing contacts between Western scholars and Tibetans, have created a widening circle of English-speakers—in government, business, academia, and elsewhere—who need to speak or write Tibetan with precision and clarity. For these people, and for others who want to communicate with Tibetans in their own language, Professor Goldstein's Dictionary will be an indispensable aid.

The first scholarly English-Tibetan dictionary, as well as the only one that is semantically sensitive, this work specifies the Tibetan terms that correspond to the submeanings of a single English term. Containing roughly 16,000 main entries, most of which have multiple subentries, the Dictionary treats a total of 45,000 lexical items. Each entry includes both the written Tibetan orthography and a phonemic notation to indicate pronunciation. Grammatical features are also noted, and all examples of usage are presented with the romanization of the written Tibetan and phonemic notation of the spoken forms. An introductory essay familiarizes users with the main

features of Tibetan grammar.
