The Complete Illustrated Encyclopedia of Dinosaurs & Prehistoric Creatures Penguin

The Allegory of the Cave, or Plato's Cave, was presented by the Greek philosopher Plato in his work Republic (514a–520a) to compare "the effect of education (???????) and the lack of it on our nature". It is written as a dialogue between Plato's brother

Glaucon and his mentor Socrates, narrated by the latter. The allegory is presented after the analogy of the sun (508b–509c) and the analogy of the divided line (509d–511e). All three are characterized in relation to dialectic at the end of Books VII and VIII (531d–534e). Plato has Socrates describe a group of people who have lived chained to the wall of a cave all of their lives, facing a blank wall. The people watch shadows projected on the wall from objects passing in front of a fire behind them, and give names to these shadows. The shadows are the prisoners' reality.

This reference work is the seventh supplement to *Dinosaurs: The Encyclopedia* (a 1998 American Library Association Outstanding Reference Book) and follows the intent and format of the encyclopedia and previous supplements. This supplement, as did its predecessors, offers primarily new information based upon the more recent research of vertebrate paleontologists; also, it corrects previously errors that may have crept into earlier volumes and emends outdated information. Among the many dramatic events discussed and updated are the first record of a dinosaur of any kind from Bulgaria, the first evidence of cannibalism in the genus *Tyrannosaurus*, the first evidence suggesting that some of the most avian dromaeosaurid theropods might have been venomous, the oldest known dinosaurian embryonic specimens recovered to date, and the first relatively complete dinosaur described from Korea.
