Many believe psychic gifts are bestowed upon select chosen ones, while others don't believe in the craft at all. The reality is every soul is born with heightened psychic gifts and capabilities, but somewhere along the way those senses have dimmed. All are capable of being a conduit with the other side, including those closed off and blocked to it.

There are a variety of enlightened beings residing in the spirit realms to assist human souls that request their help. They use varying means and methods to communicate with you called clair channels. These clairs are crystal clear etheric senses used to communicate with any higher

being, spirit guide, angel, departed loved one, archangel, and God. The Four Psychic Clair Senses illustrates what the core senses are, examples of how the author picks up on messages, how you can recognize the guidance, and other fun metaphysical psychic stuff. You are a walking divination tool that allows you to communicate with Spirit.

The clairs enable you to receive heavenly messages, guidance, and information that positively assist you or another along your Earthly journey. Read about the fore core clairs in order to pinpoint what best describes you and how to have a better understanding of what they are and how they work for you. The Oxford Handbook of Epistemology
Watkins Media Limited

The Oxford Handbook of Reasons and Normativity maps a central terrain of philosophy, and provides an authoritative guide to it. Few concepts have received as much attention in recent philosophy as the concept of a reason to do or believe something. And one of the most contested ideas in philosophy is normativity, the 'ought' in claims that we ought to do or believe something.

This is the first volume to provide broad coverage of the study of reasons and normativity across multiple philosophical subfields. In addition to focusing on reasons in ethics, epistemology, and the philosophy of mind, action, and language, the Handbook explores philosophical work on the nature of normativity in general. Topics covered include: the unity of normativity; the fundamentality of reasons; attempts to explain reasons in other terms; the relation of motivational reasons to

normative reasons; the internalist constraint; the logic and language of reasons and 'ought'; connections between reasons, intentions, choices, and actions; connections between reasons, reasoning, and rationality; connections between reasons, knowledge, understanding and evidence; reasons encountered in perception and testimony; moral principles, prudence and reasons; agent-relative reasons; epistemic challenges to our access to reasons; normativity in relation to meaning, concepts, and intentionality; instrumental reasons; pragmatic reasons for belief; aesthetic reasons; and reasons for emotions.

Is everything that goes on in your mind really you? Perhaps not, says Australian psychic researcher Robert Bruce. Drawing on more than two decades of firsthand research and experience, Bruce reports that our minds are subject to influences from many unseen spiritual sources. Some of these can influence how we think, feel, act, and even how our bodies function. They can make us unhappy, irritable, confused, sick, unstable, even crazy. This is why we need practical tools and countermeasures for psychic self-defense, all of which Bruce provides. This is the ultimate guide to combating the influences of earthbound spirits, deranged ghosts, astral snakes and spiders, demonic spirits, and poltergeists. This is a highly anecdotal and comprehensive practical guide to the dark side of the psychic universe.
