The notions of other peoples, cultures, and natural conditions have always been determined by the epistemology of imagination and fantasy, providing much freedom and creativity, and yet have also created much fear, anxiety, and horror. In this regard, the pre-modern world demonstrates striking parallels with our own insofar as the projections of alterity might be different by degrees, but they are fundamentally the same by content. Dreams, illusions, projections, concepts, hopes, utopias/dystopias, desires, and emotional attachments are as specific and impactful as the physical environment. This volume thus sheds important light on the various lenses used by people in the Middle Ages and the early modern age as to how they came to terms with their perceptions, images, and notions. Previous scholarship focused heavily on the history of mentality and history of emotions, whereas here the history of pre-modern imagination, and fantasy assumes

center position. Imaginary things are taken seriously because medieval and early modern writers and artists clearly reveal their great significance in their works and their daily lives. This approach facilitates a new deep-structure analysis of pre-modern culture.

Eine der elementaren Aufgaben von Theolog:innen in der Praxis ist der reflektierte Umgang mit biblischen Texten. Der Erwerb exegetischer Kompetenz ist daher unverzichtbarer Bestandteil der Ausbildungsphasen auf dem Weg ins Pfarramt und ins Lehramt. Oft scheinen aber die im Studium erworbenen Methoden der Bibelauslegung in Alltag und Praxis von Pfarrer:innen und Lehrer:innen wenig relevant zu sein. Das vorliegende Buch bietet in seinem Kernstück „Textanalysen“ konkrete Methoden für die Auslegung biblischer Texte in der Praxis. Die dargestellten Methoden orientieren sich an exegetisch-textanalytischen Ansätzen, die von der neueren Literatur- und Geschichtswissenschaft beeinflusst und fester Bestandteil aktueller Methodenbücher sowie gegenwärtiger Lehrpraxis sind. Die einzelnen Schritte zur Textanalyse werden an biblischen Texten entwickelt und an Beispielen aus dem Alten und Neuen Testament erprobt. Gerahmt wird das Buch durch den Einführungsteil „Grundlagen“, in dem grundlegende Ausführungen zu (biblischer) Hermeneutik sowie zur kulturellen Verortung biblischer Texte erörtert werden, sowie durch einen Schlussteil „Praxisfelder“ mit konkreten

Power is the essence of politics. Whoever seeks to understand and master it must understand its logic. Drawing on two decades of international experience in political consulting, Dominik Meier and Christian Blum give profound and honest insights into the inner workings of power. Introducing their Power Leadership Approach, the authors provide a conceptual analysis of power and present the tools to successfully exercise it in the political domain. "Power and its Logic" is a guidebook for politicians, business leaders, civil society pioneers, public affairs consultants and for every citizen who wants to understand the unwritten rules of politics.

Narrative Research, once the domain of
structuralist literary theory, has over the last 15
years developed into an international and
interdisciplinary field. It is now commonly
agreed that storytelling functions as a
fundamental cognitive tool for sense-making
and meaning production, and that human
beings structure and communicate lived
experience through oral, written and visual
stories. Entitled Narratology in the Age of
Cross-Disciplinary Narrative Research, this
volume collects fifteen essays which look at
narrative and narrativity from various
perspectives, including literary studies and
hermeneutics, cognitive theory and creativity
research, metaphor studies, film theory and
intermediality, as well as memory studies,
musicology, theology and psychology. The
topics touch on a wide range of issues, such as
the current state of narratology and its potential
for development, narrativity in visual and
auditive art forms, the cultural functions of
narrative, and the role of narrative concepts

across the disciplines. The volume introduces interested newcomers to the ongoing debate, reflecting the diversity of research questions and methodological approaches involved. It takes a critical, yet cautiously optimistic stance with regard to the potential for interdisciplinary collaboration between narrative researchers, and invites experienced readers from any discipline interested in narrative to join this important debate, which promotes the exchange of ideas, concepts and methods between the humanities and the social sciences.

Andreas Hepp takes an integrative look at one of the biggest questions in media and communications research: how digital media is changing society. Often, such questions are discussed in isolation, losing sight of the overarching context in which they are situated. Hepp has developed a theory of the re-figuration of society by digital media and their infrastructures, and provides an understanding of how profound today's media-related changes are, not only for institutions, organizations and communities, but for the individual as well. Rooted in the latest research, this book does not stop at a description of media-related change; instead, it raises the normative challenge of what deep mediatization should look like so that it might just stimulate a 'good life' for all. Providing original and critical research, the book introduces deep mediatization to students of media and cultural studies, as well as neighboring disciplines like sociology, political science and other cognate disciplines.

Lindroos constructs an alternative interpretation on history, time, politics and

art, approached through the moment of the Now (Jetztzeit). In the first section, she elaborates the critique of chronologic-linear way of understanding history. Through a close reading of Benjamin's "Work of Art" essay, the second section examines the problems of origins, authenticity and traditions of art through the ideas of artistic avant-garde and politicization of aesthetics. The end of the book discusses the concept of image and the new images as an Image-Space (Bildraum) of action.

This volume is the first English language presentation of the innovative approaches developed in the aesthetics of religion. The chapters present diverse material and detailed analysis on descriptive, methodological and theoretical concepts that together explore the potential of an aesthetic approach for investigating religion as a sensory and mediated practice. In dialogue with, yet different from, other major movements in the field (material culture, anthropology of the senses, for instance), it is the specific intent of this approach to create a framework for understanding the interplay between sensory, cognitive and socio-cultural aspects of world-construction. The volume demonstrates that aesthetics, as a theory of sensory knowledge, offers an elaborate repertoire of concepts that can help to understand religious traditions. These approaches take into account contemporary developments in scientific theories of perception, neuro-aesthetics and cultural studies, highlighting the socio-cultural and political context informing how humans perceive themselves and the world around them. Developing since the 1990s, the aesthetic approach has responded to debates in the study of religion, in particular striving to overcome biased categories that confined religion either to texts and abstract beliefs, or to an indisputable sui generis mode of experience. This volume documents what has been achieved to date, its significance for the study of religion and for interdisciplinary scholarship.

Within the context of globalization, cultural transformations are increasingly analyzed as hybridization processes. Hybridity itself, however, is often treated as a specifically post-colonial phenomenon. The contributors in this volume assume the historicity of transcultural flows and entanglements; they consider the resulting transformative powers to be a basic feature of cultural change. By juxtaposing different notions of hybridization and specific methodologies, as they appear in the various disciplines, this volume 's design is transdisciplinary. Each author presents a disciplinary concept of hybridization and shows how it operates in specific case studies. The aim is to generate a transdisciplinary perception of hybridity that paves the way for a wider application of this crucial concept

This textbook examines the extent to which moral values play a role as productive forces for the economy, and explores the effect of ethical and unethical Behavior on the economy. It shows how ethics improves productivity in the economy, and provides specific ethics tools for practical application for students and managers. Stemming from an overall interdisciplinary approach, and combining recent research results from sciences such as economics, business administration, Behavioral economics, philosophy, psychology and sociology, this textbook fills a gap in the literature on ethics in business. The book begins with the foundations of business ethics by defining business ethics, delineating its objectives, and discussing the importance of business ethics for business, the economy and society. Next, it presents the ethical evaluation approaches to enable the reader to evaluate economic Behavior ethically. It then explores ' man in business ' , and deals with such issues as Behavior, motivation, ethical orientation, and the presence or

absence of a sense of justice. Following this is a discussion of the rules of the market and of questions such as: Does the market economy promote ethical Behavior or is there a conflict of goals between ethics and market economy? Do companies have a social responsibility? The book concludes with an analysis of the importance of ethics for productivity in the enterprise and in the economy, and presents ethics tools as the instruments with which management can promote ethical Behavior of their employees. Following a textbook structure, the book first derives knowledge from scientific studies that is relevant for students, and then summarizes the results. It explains ethical assessment approaches, and then gives an ethical assessment of economic Behavior using case studies. It uses roleplaying and games to explain the Behavior of people in relation to ethics.

This open access volume assesses the influence of our changing media environment. Today, there is not one single medium that is the driving force of change. With the spread of various technical communication media such as mobile phones and internet platforms, we are confronted with a media manifold of deep mediatization. But how can we investigate its transformative capability? This book answers this question by taking a non-media-centric perspective, researching the various figurations of collectivities and organizations humans are involved in. The first part of the book outlines a fundamental understanding of the changing media environment of deep mediatization and its transformative capacity. The second part focuses on collectivities and movements: communities in the city, critical social movements, maker,

online gaming groups and networked groups of young people. The third part moves institutions and organizations into the foreground, discussing the transformation of journalism, religion, politics, and education, whilst the fourth and final part is dedicated to methodologies and perspectives.

Talking Dialogue Universit ä tsverlag Potsdam Convergence has gained an enormous amount of attention in media studies within the last several years. It is used to describe the merging of formerly distinct functions, markets and fields of application, which has changed the way companies operate and consumers perceive and process media content. These transformations have not only led business practices to change and required companies to adapt to new conditions, they also continue to have a lasting impact on research in this area. This book ' s main purpose is to shed some light on crucial phenomena of media and convergence management, while also addressing more specific issues brought about by innovations related to media, technologies, industries, business models, consumer behavior and content management. This book gathers insights from renowned academic researchers and pursues a highly interdisciplinary approach. It will serve as a valuable reference guide for students, practitioners and researchers interested in media convergence processes.

In reading the literary rhetoric of the Book of exodus Kurle uncovers new insights in the author's purposes. The unique work undertakes to interpret the Book of exodus as a whole in terms of its rhetorical aims. The approach is distinguished from traditional critical readings in focussing not on the origin of the texts, nor on the theological specifics of putative sources, but on the text understood as having a coherent rhetorical strategy. It is also distinguished from expressly theological readings of the book. Kurle proceeds by considering, Yahweh, Moses

and Israel as 'characters' in the literary sense, and exploring how the text operates through them on its 'implied readers'. Thus the particular focus is on the functional aspects of the text which direct the reading process and thus guide the reader in the perception of the ideas, concepts and stories presented. 'The book of Exodus is the foundation for Israel's identity in its relation to God and part of the foundation of Jewish-Christian ethics. In *The Appeal of Exodus* Stefan Kurle offers a thorough, exegetically profound and pleasantly readable study using a functional-synchronic approach with a rhetorical-critical analysis. He concentrates completely on what the biblical text itself presents, looking at the persuasive nature of that text and presupposing an implied reader who has a certain knowledge of his own history. In the same manner the modern reader will be able to sense Israel's exciting journey from the oppressive slavery in Egypt to God's presence at Sinai.' Lexicography, together with grammatical studies and textual criticism, forms the basis of biblical exegesis. Recent decades have seen much progress in this field, yet increasing specialization also tends to have the paradoxical effect of turning exegesis into an independent discipline, while leaving lexicography to the experts. The present volume seeks to renew and intensify the exchange between the study of words and the study of texts. This is done in reference to both the Hebrew source text and the earliest Greek translation, the Septuagint. Questions addressed in the contributions to this volume are how linguistic meaning is effected, how it relates to words, and how words may be translated into another language, in Antiquity and today. Etymology, semantic fields, syntagmatic relations, word history, neologisms and other subthemes are discussed. The main

current and prospective projects of biblical lexicology or lexicography are presented, thus giving an idea of the state of the art. Some of the papers also open up wider perspectives of interpretation.

The Appeal of Exodus Mohr Siebeck
Um die heutige Welt zu begreifen, sollten wir uns nach Präsident Macron mit dem Werk „Das Kapital“ von Marx beschäftigen. Tatsächlich stellt sich nach der Finanzkrise 2007/2008 und nach Karl Marx' 200. Geburtstag im Jahr 2018 die Frage, wie aktuell sein Werk auch oder vielleicht gerade heute noch ist. In diesem Fachbuch werden deshalb verschiedene Aspekte aus dem Leben und Werk von Karl Marx beleuchtet. Dabei verfolgen die Autoren, Forscher der Universität Rostock, einen interdisziplinären Ansatz und behandeln sowohl Marx' Religionskritik als auch die Frage nach seinem politischen Denken. Thematisiert werden Marx' Interpretationen von Kapital und Geld sowie sein Kommunismusverständnis und sein Kapitalverstehen. War Karl Marx ein politischer Denker? Kann Karl Marx die Finanzkrise 2007/08 erklären und wenn ja, vielleicht sogar besser als der ökonomische Mainstream? Welchen Stellenwert kann seiner Philosophie und seiner Geld- und Kredittheorie beigemessen werden? Stimmen Kernaussagen seiner Kapitalismuskritik? In sechs Kapiteln, die auch unabhängig voneinander gelesen werden können, gehen die Autoren eingehend auf diese Fragen und Themen ein.
