The book analyses the Indian Supreme Court's jurisprudence on homosexuality, its current approach and how its position has evolved in the past ten years. It critically analyses the Court's landmark judgments and its perception of equality, family, marriage and human rights from an international perspective. With the help of European Court of Human Rights' judgments and international conventions, it compares the legal and social discrimination meted out to the Indian LGBTI community with that in the international arena. From a social anthropological perspective, it demonstrates how gay masculinity, although marginalized, serves as a challenge to patriarchy and hegemonic masculinity. This unique book addresses the lack of in-depth literature on gay masculinity, elaborately narrating and analysing contemporary gay masculinity and emerging gay lifestyles in India and highlighting the latest research on the subject of homosexuality in general and in particular with respect to India. It also discusses several new issues concerning the gay men in India supported by the living law approach put forth by Eugen Ehrlich.

More than two millennia ago, Aristotle is said to have compiled a collection of ancient constitutions that informed his studies of politics. For Aristotle, constitutions largely distilled and described the varied and distinctive patterns of political life established over time. What constitutionalism has come to mean in the modern era, on the other hand, originates chiefly in the late eighteenth century and primarily with the U.S. Constitution—written in 1787 and made effective in 1789—and the various French constitutions that first appeared in 1791. In the last half century, more than 130 nations have adopted new constitutions, half of those within the last twenty years. These new constitutions are devoted to many of the same goals found in the U.S. Constitution: the rule of law, representative self-government, and protection of rights. But by canvassing constitutional developments at the national and state level in the United States alongside modern

constitutions in Eastern and Western Europe, Africa, and Asia, the contributors to *Modern Constitutions*—all leading scholars of constitutionalism—show that modern constitutions often seek to protect social rights and to establish representative institutions, forms of federalism, and courts charged with constitutional review that depart from or go far beyond the seminal U.S. example. Partly because of their innovations, however, many modern constitutional systems now confront mounting authoritarian pressures that put fundamental commitments to the rule of law in jeopardy. The contributions in this volume collectively provide a measure of guidance for the challenges and prospects of modern constitutions in the rapidly changing political world of the twenty-first century. The WTO Secretariat reports that during the period from 1995 to June 30, 2007 WTO members initiated 3097 anti-dumping investigations. Of these, 474 were put forward by India, which made it the largest user of this measure among WTO Members. The traditional argument of developing countries was that loopholes or absence of clear definitions in the anti-dumping rules have increased the possibility of abuses and discretionary practices against them. Now, many developing countries like India have become frequent users of this measure. For a better understanding of the various provisions of the WTO's Anti-dumping Agreement (ADA) a critical investigation of the resulting jurisprudence is a necessity. To that end, this timely work has a fivefold aim: and • To explore the jurisprudence that has emerged around the anti-dumping regime and how it affected developing countries; and • To assess how effectively and to what extent the WTO's Dispute Settlement Body (DSB) is able to analyze the violations of ADA provisions; and • To examine domestic compliance with DSB decisions; and • To study the Indian cases which come before the nation's Customs, Excise andamp; Sales Tax Appellate Tribunal, various High Courts and the Supreme Court of India; and and • To offer recommendations for the improvement of the anti-dumping regime from a developing country perspective.

The criminal procedures examined in this book include those of the United States, Germany, France, Spain, Russia, India, Latin America, Taiwan and Japan, among others.
