"I find Au Contraire! delightfully validating - a great piece of work." - Nancy Bragard, Franco-American interculturalist, trainer and coach  
The French are famously enigmatic: fiercely independent yet

---

deeply romantic, conservative yet avant-garde, rational yet emotional. What is it, exactly, that makes the French so . . . French? Written for anyone interacting with the French- tourists, businesspeople, international students, Francophiles- Au Contraire! offers a perceptive understanding of French cultural beliefs, assumptions and attitudes, along with practical advice on building strong personal and professional relationships with the French. Addressing issues like friendship, politics, work, education and romance, bilingual and bi cultural authors Asselin and Mastron draw upon their own experiences as consultants and trainers, as well as those of students and professionals, giving readers a

complete-and compelling-look at French culture. This revised edition of Au Contraire! includes updated information about France's changing social and political climate, advice for succeeding as an expat, information about the French educational system, overviews of France's diverse regions-and more.

"Christine's ability to wrap a process around her unique and proven sales techniques is amazing. In the sales training session that she led for our team, we all walked away with solid tools to help in negotiation as well as

communication. Her ability to capture an audience and speak to her unique skills from years of sales experiences is, in my experience, rare. I think we benefited most by the solid examples she provided of techniques and tools that we could use. I highly recommend Christine." Participation in sailing is declining in America, down more than 40% since 1997 and 70% since 1979. In this provocative book, researcher and avid sailor Nicholas Hayes explains why. The book shows how pressures on

free time have increased, and how, in response, many Americans have turned to extremes of spectator or highly structured activities . . . and away from lifelong, family-based, multi-generational recreation. *Saving Sailing* builds a case for choosing how to spend free time better, using it for quality experiences with families and friends through rewarding pastimes like sailing. The main challenge, the author suggests, is to develop an active system of mentoring,

---

especially between generations. The lessons are broader than sailing, with useful ideas for all parents, for anyone seeking to strengthen the social fabric of American communities, and for those involved in programming for youth and adult activities.

Simple Guide to France

The semiconductor industry is a vital industry for military establishments worldwide, and the control of, or loss of control of, this key industry has enormous strategic implications. This book focuses on the globalization of the

strategic semiconductor industry and the security ramifications of this process. It examines in particular the migration of the Taiwanese chip industry to China as part of the globalization of production processes, and the extent to which such a globalization process poses security challenges to the United States, China and Taiwan. Transcending disciplinary boundaries between international political economy, security studies, and the history of science and technology, this multidisciplinary work provides an in-depth understanding of the globalization-security nexus, and disentangles the key policy issues connected to a potential explosive flashpoint in

world politics today.

He emerged from nowhere to seize the presidency, defeat populism and upend French party politics. Who is Emmanuel Macron? How far can he really change France? In Revolution Française, Sophie Pedder examines the first year in office of France's youngest and most exciting president in modern times, with a unique perspective from her time as head of The Economist's Paris bureau. President Emmanuel

Macron's vision for France is far more radical than many realise. His remarkable ascent from obscurity to the presidency is both a dramatic story of personal ambition and the tale of a wounded once-proud country in deep need of renewal. What shaped this enigmatic character, the precociously bright student and talented networker from northern France; the philosophy graduate and Rothschild banker who married his school drama teacher? How did a political outsider manage to defy the unwritten rules of the Fifth Republic and secure the presidency at his first attempt? And what are the underlying ideas behind his vision? This book chronicles Macron's remarkable rise from independent outsider to the Élysée Palace, situating the achievement in a broader context: France's slide into self-doubt, political gridlock and a seeming reluctance to embrace change; the roots of populism and discontent; the fractures caused by globalisation and the Le Pen factor. Looking back on the young president's dramatic first year in power, with analysis of his key reforms and lofty ambitions, it asks how far it is possible for Macron to reinvent a conservative nation uneasy about embracing the future. Can the man nicknamed 'Jupiter' really return France to its former greatness, or will he, by the time his mandate expires, end up as just another side note in political history? Punctuated with first-hand conversations and reporting, this book takes on

---

all of these questions, concluding with a fascinating and exclusive interview with Macron recorded in early 2018. Pedder's riveting, and essential, book will be one of the most captivating political books of this year.

The volume consists of six parts devoted to literature,

languages, history, culture, science, religions and philosophy of the Eastern World. Its aim is to portray the present-day state of oriental studies, which are here understood predominantly as philologies of Asia and Africa, but also as a field of study including other, adjacent disciplines of the humanities, not neglecting the history of oriental research. The book 's multidisciplinary content reflects the multi- and often interdisciplinary nature of oriental studies

today. Part 1 (Literature) offers new insights into belles-lettres written in Arabic, Hindi, Turkish, Urdu, Persian and Japanese. Part 2 (Linguistics) contains studies on Sanskrit texts (in a stylometric approach), Japanese nominals, Japanese poetry as a linguistic source, Arabic translations of the Bible, Arabic dialect of Morocco, Arabic culinary terms of Persian origin and Turkish vocabulary of the language reform era. Part 3 (History) investigates Napoleon ' s campaign in

the Middle East, Middle Eastern-Russian relations in the 18th century, the history of Seljuk Empire and the works of a Moroccan historian, a far Ibn A mad an-N r as-Salaw . Part 4 (History of Oriental Studies) deals with the history of oriental studies in Krak ó w and with the problems of a critical edition of the Quran. Part 5 (Culture and Science) examines the artistic achievements of Egyptian moviemaker Y suf Š ah n and possible influence of the Muslim

science on medieval Polish scholars. Part 6 (Religion and Philosophy) explores some philosophical concepts of the Confucian ethics and the contribution of Kar ma Bint A mad Al-Marwaziyya to preservation and transmission of some religious traditions of Islam. Majoritarian State traces the ascendance of Hindu nationalism in contemporary India. Led by Prime Minister Narendra Modi, the BJP administration has established an ethno-religious and populist style of rule since 2014. Its agenda is also pursued beyond the formal branches of government, as the new dispensation portrays conventional social hierarchies as intrinsic to Indian culture while condoning communal and

caste- and gender-based violence. The contributors explore how Hindutva ideology has permeated the state apparatus and formal institutions, and how Hindutva activists exert control over civil society via vigilante groups, cultural policing and violence. Groups and regions portrayed as 'enemies' of the Indian state are the losers in a new order promoting the interests of the urban middle class and business elites. As this majoritarian ideology pervades the media and

public discourse, it also affects the judiciary, universities and cultural institutions, increasingly captured by Hindu nationalists. Dissent and difference silenced and debate increasingly sidelined as the press is muzzled or intimidated in the courts. Internationally, the BJP government has emphasised hard power and a fast-expanding security state. This collection of essays offers rich empirical analysis and documentation to investigate the causes and consequences of the illiberal turn taken by

Au Contraire!

HarperThorsons

This sumptuously illustrated volume analyzes artists' representations of angels and demons and heaven and hell from the Judeo-Christian tradition and describes how these artistic portrayals evolved over time. As with other books in the Guide to Imagery series, the goal of this volume is to help contemporary art enthusiasts decode the symbolic meanings in the great

masterworks of Western Art. The first chapter traces the development of images of the Creation and the Afterworld from descriptions of them in the Scriptures through their evolution in later literary and philosophical works. The following two chapters examine artists' depictions of the two paths that humans may take, the path of evil or the path of salvation, and the punishments or rewards found on each. A chapter on the Judgment Day and the end of the world explores portrayals of the mysterious

worlds between life and death and in the afterlife. Finally, the author looks at images of angelic and demonic beings themselves and how they came to be portrayed with the physical attributes--wings, halos, horns, and cloven hooves--with which we are now so familiar. Thoroughly researched by and expert in the field of iconography, Angels and Demons in Art will delight readers with an interest in art or religious symbolism. Revolution Fran ç aise Global Oriental

As the glittering skyline in Shanghai seemingly attests, China has quickly transformed itself from a place of stark poverty into a modern, urban, technologically

savvy economic powerhouse. But as Scott Rozelle and Natalie Hell show in *Invisible China*, the truth is much more complicated and might be a serious cause for concern. China ' s growth has relied heavily on unskilled labor. Most of the workers who have fueled the country ' s rise come from rural villages and have never been to high school. While this national growth strategy has been effective for three decades, the unskilled wage rate is finally rising, inducing companies inside China to automate at an unprecedented rate and triggering an exodus of companies seeking cheaper labor in other countries. Ten years ago, almost every product for sale in an American Walmart was made in

China. Today, that is no longer the case. With the changing demand for labor, China seems to have no good back-up plan. For all of its investment in physical infrastructure, for decades China failed to invest enough in its people. Recent progress may come too late. Drawing on extensive surveys on the ground in China, Rozelle and Hell reveal that while China may be the second-largest economy in the world, its labor force has one of the lowest levels of education of any comparable country. Over half of China ' s population—as well as a vast majority of its children—are from rural areas. Their low levels of basic education may leave many unable to find

---

work in the formal workplace as readers alike.

China ' s economy changes and manufacturing jobs move elsewhere. In Invisible China, Rozelle and Hell speak not only to an urgent humanitarian concern but also a potential economic crisis that could upend economies and foreign relations around the globe. If too many are left structurally unemployable, the implications both inside and outside of China could be serious. Understanding the situation in China today is essential if we are to avoid a potential crisis of international proportions. This book is an urgent and timely call to action that should be read by economists, policymakers, the business community, and general
