This book provides a comprehensive workshop on studio photography aimed at aspiring professionals. Richly illustrated, it covers an array of photographic subjects including still life, industry, technology, food, jewelry, portraiture, and more. The first part of the book focuses on concepts of studio planning, lighting, perspective, and camera and lens choices. The workshops that follow include 50 full-page photographic masterpieces, each with a detailed description of how the image was created. Author Dennis Savini walks the reader through all of the steps that led to each of his magnificent studio shots as he describes and

illustrates the camera and equipment specs, studio design and setup, lighting, and post-processing. All of this information is communicated in a clear and simple manner and includes example images, diagrams of studio setups and lighting arrangements, and computer screenshots. Savini reveals the tips, tricks, and secrets he has learned throughout his many years as a professional photographer and teacher.

Without light, there is no photograph. As almost every photographer knows, the word "photograph" has its roots in two Greek words that, together, mean "drawing with light." But what is less commonly

acknowledged and understood is the role that shadow plays in creating striking, expressive imagery, especially in portraiture. It is through deft, nuanced use of both light and shadow that you can move beyond shooting simply ordinary, competent headshots into the realm of creating dramatic portraiture that can so powerfully convey a subject's inner essence, communicate a personal narrative, and express your photographic vision.

In The Dramatic Portrait: The Art of Crafting Light and

Shadow, Chris Knight addresses portraiture with a unique approach to both light and shadow that allows you to improve and elevate your own portraiture. He begins with the history of portraiture, from the early work of Egyptians and Greeks to the sublime treatment of light and subject by artists such as Caravaggio, Rembrandt, and Vermeer. Chris then dives into a deep, hands-on exploration of light, shadow, and portraiture, offering numerous lessons and takeaways. He covers:

- The qualities of light:

hard, soft, and the spectrum in between

- The relationships between light, subject, and background, and how to control them
- Lighting patterns such as Paramount, Rembrandt, loop, and split
- Lighting ratios and how they affect contrast in your image
- Equipment: from big and small modifiers to grids, snoots, barn doors, flags,

and gels

- Multiple setups for portrait shoots, including those that utilize one, two, and three lights

- How color contributes to drama and mood, eliciting an emotional response from the viewer

- How to approach styling your portrait, from wardrobe to background

- The post-processing workflow, including developing the RAW file,

maximizing contrast, color grading, retouching, and dodging and burning for heightened drama and effect

- How all of these elements culminate to help you define your personal style and create your own narrative

Alexander Raymond, Abnoe Editions Eyrolles
An illustrated exploration of colors and patterns in

the animal kingdom, what they communicate, and how they function in the social life of animals. Are animals able to appreciate what humans refer to as “ beauty ” ? The term scarcely ever appears nowadays in a scientific description of living things, but we humans may nonetheless find the colors, patterns, and songs of animals to be beautiful in apparently the same way that we see beauty in works of art. In *Animal Beauty*, Nobel Prize – winning biologist Christiane N ü sslein-Volhard describes how the colors and patterns displayed by animals arise, what they communicate, and how they function in the social life of animals. Watercolor drawings illustrate these amazing instances of animal beauty. Darwin addressed the topic of ornament in his 1871 book *The Descent of Man and Selection in Relation to Sex*, and did not hesitate to engage with criteria of beauty, convinced that animals experienced color and ornament as attractive and agreeable in the same way that we do, and that the role this played in mate choice pointed to a “ sexual selection ” distinct from natural selection.

N ü sslein-Volhard examines key examples of ornament and sexual selection in the animal kingdom and lays the groundwork for biological aesthetics. Noting that color patterns have not been a research priority—perhaps because they appeared to be nonessential luxuries rather than functional necessities—N ü sslein-Volhard looks at recent scientific developments on the topic. In part because of N ü sslein-Volhard's own research on the zebrafish, it is now possible to decipher the molecular genetic mechanisms that lead to production of colors in animal skin and its appendages and control its pattern and distribution.

Based on the author's online photography project, this stunning collection features portraits of 500 women from more than 50 countries, accompanied by revelatory captions that capture their personal stories. Since 2013 photographer Mihaela Noroc has traveled the world with her backpack and camera taking photos of everyday women to showcase the

diversity of beauty all around us. The Atlas of Beauty is a collection of her photographs celebrating women from all corners of the world, revealing that beauty is everywhere, and that it comes in many different sizes and colors. Noroc's colorful and moving portraits feature women in their local communities, ranging from the Amazon rainforest to London city streets, and from markets in India to parks in Harlem, visually juxtaposing the varied physical and social worlds these women inhabit. Packaged as a gift-worthy, hardcover book, The Atlas of Beauty presents a fresh perspective on the global lives of women today.

In contrast to narrative, description is a much less researched phenomenon, and where it so far has found attention at all, scholars have almost always discussed it with fiction in mind. The all but exclusive concentration on literature has hitherto obscured the fact that description transcends literature and indeed the verbal media in general and is not only a transgeneric but also a transmedial phenomenon that can be found in many other media and arts. This book is a pioneering interdisciplinary study of description since it for the first time undertakes to close this research lacuna by highlighting description and its relevance with reference to a wide spectrum of arts and media. The volume opens with a detailed introductory essay, which aims at clarifying the descriptive as a basic semiotic form of organizing signs from a theoretical perspective but also

provides a first overview of the uses of description as well as its problematics in fiction, painting and instrumental music. In the main part of the book, nine contributions by scholars from various disciplines explore description in individual media and different cultural epochs. The first section of the book is dedicated to literature and related (partly) verbal media and includes a typological and historical survey of description in fiction as well as discussions of its occurrence in poetry, nature writing, radioliterature and film. The second part deals with the (purely) visual media and ranges from a presentation of the descriptive techniques used in Durer's graphic reproductions to general reflections on 'the descriptive' in the visual arts as well as in photography. A third section on description in music provides a perspective on yet another medium. The volume, which is the second one in

the series `Studies in Intermediality?', is of relevance to students and scholars from various fields: intermedial studies, literary and film studies, history of art, and musicology.

When it comes to photography, it ' s all about the light. After spending more than thirty years behind the lens—working for National Geographic, Time, Life, and Sports Illustrated—Joe McNally knows about light. He knows how to talk about it, shape it, color it, control it, and direct it. Most importantly, he knows how to create it...using small hot shoe flashes.

In The Hot Shoe Diaries, Joe brings you behind the scenes to candidly share his lighting solutions for a ton of great images. Using Nikon Speedlights, Joe lets you in on his uncensored thought process—often funny, sometimes serious, always fascinating—to demonstrate how he makes his pictures with these small flashes. Whether he's photographing a gymnast on the Great Wall, an alligator in a swamp, or a fire truck careening through Times Square, Joe uses these flashes to create great light that makes his pictures sing.

Unlocking the Groove is a groundbreaking, award-winning, music-driven analysis of electronic dance music (EDM). Author Mark Butler interweaves traditional and non-traditional musical analysis with consideration of the genre's history and social

significance, deconstructing several typical examples of electronic dance music and focusing on the interaction of beat and rhythmic structure in creating an overall musical design. Interviews with DJs, listeners, and producers flesh out the book, providing insight into the perceptions and performance world of EDM, and making a vivid case for the musical artistry of EDM disc jockeys. The CD included with the book illustrates the analysis with multiple musical examples, both in excerpts and full songs. Butler's work propels the study of popular music in exciting new directions, and will impact the range from popular music studies, music theory, ethnomusicology, and musicology.

Alexander Kluge turns 75 in autumn 2007, and to celebrate he will be the Special Guest of Honor at the 75th Venice Film Festival, showing his films in the Grand Salon; he will enjoy a MoMA retrospective; Facets Multimedia will launch DVDs of all his dozens of movies and all his TV work and New Directions is proud to present his new fiction collection, all about the cinema. The thirty-eight tales of "Cinema Stories" combine fact and fiction, and they all revolve around movie-making. The book compresses a lifetime of feeling, thought, and practice:

Kluge--considered the father of New German Cinema--is an inventive wellspring of narrative notions. "The power of his prose," as "Small

Press" noted, "exudes the sort of pregnant richness one might find in the brief scenarios of unknown films." "Cinema Stories" is a treasure box of cinematic lore and movie magic by "Alexander Kluge, that most enlightened of writers" (W. G. Sebald).

A critical primer on the work of Andy Warhol. Andy Warhol (1928-1987), one of the most celebrated artists of the last third of the twentieth century, owes his unique place in the history of visual culture not to the mastery of a single medium but to the exercise of multiple media and roles. A legendary art

world figure, he worked as an artist, filmmaker, photographer, collector, author, and designer. Beginning in the 1950s as a commercial artist, he went on to produce work for exhibition in galleries and museums. The range of his efforts soon expanded to the making of films, photography, video, and books. Warhol first came to public notice in the 1960s through works that drew on advertising, brand names, and newspaper stories and headlines. Many of his best-known images, both single and in series, were produced within the context of pop art. Warhol was a major figure in the bridging of the gap between high and low art, and his mode of production in the famous studio known as "The Factory" involved the recognition of art making as one form of enterprise among others. The radical nature of

that enterprise has ensured the iconic status of his art and person. Andy Warhol contains illustrated essays by Benjamin H. D. Buchloh, Thomas Crow, Hal Foster, Rosalind Krauss, Annette Michelson, and Nan Rosenthal, plus a previously unpublished interview with Warhol by Buchloh. The essays address Warhol's relation to and effect on mass culture and the recurrence of disaster and death in his art.
