Mutations of Hellenism in Late Antiquity Springer Science & Business Media

L'avènement de la libéralisation des marchés de l'énergie a été un facteur clé de succès du développement des énergies renouvelables et de la maîtrise de la demande en énergie. L'insertion massive des productions décentralisées intermittentes sur les réseaux de distribution engendre une complexité de fonctionnement qui est préjudiciable à la sécurité. L'introduction des technologies de l'information et de la communication permet de pallier cette difficulté et ouvre des perspectives nouvelles dans la maîtrise de la demande énergétique en intégrant le consommateur dans le pilotage du réseau. C'est l'objet de l'ouvrage consacré aux réseaux intelligents connus sous le nom de SmartGrids. Le concept de Smartgrids est abordé sous diverses facettes par l'aspect commercial, économiques, réglementaire par des auteurs spécialistes de ces questions. La partie technique est abordée à la fois par l'aspect énergétique et celui des télécommunications et du comptage.

Astronautical Research 1971 Walter de Gruyter GmbH & Co KG

Ces créatures d'images polymorphes que sont les avatars jouables nous font exister dans les mondes numériques des jeux vidéo, et même dans certains sites Web communautaires ou ludiques. Parce qu'elles nous y métamorphosent, elles apparaissent emblématiques des pratiques interactives les plus sophistiquées et troublantes. Toutefois, leurs propriétés et effets, espérés ou redoutés, restent encore à éclairer, ainsi que toutes ces

interactions à distance réalisées par avatars interposés, au cœur des simulations audiovisuelles informatiques contemporaines. Ancré en sciences de l'information et de la communication, ce premier ouvrage collectif francophone sur le thème conceptualise l'avatar. Aussi, il bénéficie des apports conjugués de différentes disciplines (philosophie des techniques, psychologie, psychanalyse, sémiologie, ethnologie, sociologie, sciences de la gestion, arts). Par cette pluralité et grâce à de constants allers-retours entre théories et terrains, descriptions et analyses, hypothèses et témoignages, peuvent être articulées toutes les dimensions en jeu : technologiques, physiologiques, interpersonnelles, identitaires, intimes et/ou culturelles.

SmartGrids : les réseaux électriques intelligents Eisenbrauns

Since it was first published, *French in Action: A Beginning Course in Language and Culture—The Capretz Method* has been widely recognized in the field as a model for video-based foreign-language instructional materials. The third edition, revised by Pierre Capretz and Barry Lydgate, includes new, contemporary illustrations throughout and, in the Documents section of each lesson, more-relevant information for today's students. A completely new feature is a journal by the popular character Marie-Laure, who observes and comments humorously on the political, cultural, and technological changes in the world between 1985 and today. The new edition also incorporates more content about the entire Francophone world. In use by hundreds of colleges, universities, and high schools, *French in Action* remains a powerful educational resource that this third edition updates for a new generation of learners. Part 2 gives students at the intermediate level the tools they need to communicate effectively in French and to understand and appreciate French and Francophone cultures.

Greek Literature and Philosophy Routledge

The International Astronautical Federation is the only professional society in the field of aerospace engineering and Sciences which brings together specialists of all countries interested in the exploration and peaceful exploitation of space. At its

annual Congresses a large number of invited and/or carefully selected contributed papers are presented which cover a wide variety of topics and are distributed over a number of sessions, each one being organized by two leading scientists who later chair the session itself. Each year the selection of specific topics to be dealt with is dictated either by significant new progress achieved in some sectors or by new developments and trends which are liable to influence substantially the objectives toward which space research and/or application of space technology will be oriented in the immediate future. A second rigorous screening, performed with the help of the Session Chairmen and carried out according to the same criteria identifies finally the papers which are published in the Proceedings. The outcome of all this is reliable and authoritative information as to the actual status and future trends of space activities, both from the research point of view and from the point of view of utilization and/or application.

Doping Rules of International Sporting Organisations Lavoisier

This volume is available on its own or as part of the seven volume set, *Greek Literature*. This collection reprints in facsimile the most influential scholarship published in this field during the twentieth century. For a complete list of the volume titles in this set, see the listing for *Greek Literature* [ISBN 0-8153-3681-0]. A full table of contents can be obtained by email: reference@routledge-ny.com.

French in Action Langaa RPCIG

This book is a composite of 40 purely scientific and peer-reviewed papers presented during the Seventh World Congress of African Linguistics (WOCAL7) at the University of Buea, Cameroon, in 2012. The different chapters of the volume fall within the scope of African languages in relation to linguistics and other related disciplines, where a varied range of theoretical examinations, investigations and/or discussions as well as pure description of aspects of language are offered. For the purpose of clarity and easy accessibility of the content, the chapters are further subcategorized

into nine sections, which include: Borrowing, Discourse Analysis, Historical Linguistics, Intercultural Communication, Language Documentation, Language in Education, Morpho-syntax, Phonetics and Phonology, and Sociolinguistics.

Abrégé de la Mythologie Universelle, Ou, Dictionnaire de la Fable Lavoisier

The 21 studies in this volume, which deal with issues of social and intellectual history, religion and historical methodology, explore the ways whereby over the course of a few hundred years -roughly between the second and the fifth centuries A.D.- an anthropocentric culture mutated into a theocentric one. Rather than underlining the differences between a revamped paganism and the emergent Christian traditions, the essays in the volume focus on the processes of osmosis, interaction and acculturation, which shaped the change in priorities among the newly created textual communities that were spreading across the entire breadth of the late antique oecumene. The main issues considered in this connection include the phenomena of textuality and holy scripture, canonicity and exclusion, truth and error, prophecy and tradition, authority and challenge, faith and salvation, holy places and holy men, in the context of the construction of new orthodox readings of the Greek philosophical heritage. Moreover the volume suggests that intolerant attitudes, which form a characteristic trait of monotheisms, were not an exclusive preserve of Christianity (as the Enlightenment tradition would insist), but were progressively espoused by pagan philosophers and divine men as part of the theory and practice of Hellenism's theological koine. Efforts to establish the monopoly of a revealed truth against any rival claims were transversal to the textual communities which emerged in late antiquity and remodelled the intellectual and spiritual landscape of the Greater Mediterranean.

Cumulated Index Medicus D'un Montmartre l'autre

This volume offers French and English transcripts of the 1914 International Convention for the Safety of Life at Sea, a treaty resulting from the Titanic disaster.

NOW or NEVER Routledge

Nous avons tous, d'une manière ou d'une autre, un impact sur notre environnement, sur la société et sur le

futur. Pouvant communiquer avec la planète entière, chacun peut donc aujourd'hui prendre des initiatives et contribuer à l'évolution. Ce livre s'adresse à un vaste lectorat mais, en tout premier lieu, aux dirigeants d'entreprises et d'organisations sociales, culturelles et politiques, ainsi qu'aux éducateurs et aux parents, afin de leur parler non seulement de la nécessité, mais surtout de l'urgence, de changer de paradigme, d'enclencher des stratégies créatrices de valeurs et d'équilibre. Par son expérience de plus de 25 ans sur le terrain, Edel Gött a constaté que seules les personnes qui réunissent l'intelligence de la raison et l'intelligence du coeur et qui s'ouvrent à leur ressenti, réussissent un véritable repositionnement sur la base d'une implication personnelle. L'auteure ne s'adresse ni à la fonction ni au statut social, mais à l'Être humain derrière et au-delà des apparences. Elle souhaite interpeller et encourager tous ceux et celles qui s'ouvrent à l'évolution pour qu'ils accèdent à leur plein potentiel, qu'ils relèvent le défi d'une rencontre vraie avec eux-mêmes et qu'ils contribuent à créer un monde meilleur.

Laws for the Government of the District of Louisiana Passed by the Governor and Judges of the Indiana Territory

Yale University Press

Déodat de Séverac (1872-1921) is best known for his piano music but his compositions included orchestral and vocal works, including opera, cantata and incidental music. Claude Debussy described Séverac's music as "exquisite and rich with ideas." The early works were influenced by Impressionist harmonies, church modes, cyclic techniques, folk-like melodies and Andalusian motives. Séverac's style changed dramatically in 1907 when he left Paris and began to include Catalan elements in his compositions - a transition that has hitherto gone unrecognized. Robert Waters provides a much-needed study of the life and works of Séverac, focusing on the composer's regionalist philosophy. Séverac's engagement with folk music was not a patriotic gesture in the vein of nationalistic composers, but a way of expressing regional identity within France to counter the restrictive styles sanctioned by the Paris Conservatory. His musical philosophy mirrored larger social and political debates regarding anti-centralist positions on education, politics, art and culture in fin de siècle France. Such debates involved political and social leaders whom Séverac knew and personally admired, including the writer Maurice Barrès and the poet Frédéric Mistral. The book will appeal to those specializing in French music, European ethnic musics, piano music and French music history.
