The First World War led to a fundamental reorganization of international relations. This had a profound impact on churches and mission agencies and their ecumenical networks.

European Christianity was increasingly questioned. The shock was all the greater since the war alliances were formed without taking religious orientation into consideration. This volume examines the impact of the war on church and mission especially in Africa and Asia. The contributions provide a wide scope of historical analyses with a focus on the Hermannsburg Mission. The symposium was organized by the Ludwig-Harms-Kuratorium and the Fachhochschule f ü r Interkulturelle Theologie Hermannsburg in 2018.

Signs & Symbols of the World Penguin

Can global justice be promoted by distributing money more equitably? Could even relatively small financial sacrifices by the affluent work, through benign leverage, to achieve that goal? Global Justice and Finance casts new light on such questions by considering what is presupposed about finance. Redistributive proposals assume money to be a reliable measure, store of value, and medium of exchange. Yet maintaining stable interest, inflation, and exchange rates in a dynamic capitalist economy is a considerable achievement involving a complex financial system. Such global coordination could, if so directed, contribute immensely to humanity's betterment, yet under the direction of a profit seeking elite it leaves a majority disempowered, impoverished, and indebted. To pay debts, ever more desperate measures to wrest value from the world's natural resources increase ecological pressures to harmful extremes, and those pressures do not stop short of driving wars. The profit seeking economy is held in place by the complex legal arrangements that constitute finance. Globally, there has developed, unannounced and unaccountably, what amounts to a privatised constitution - binding agreements that transcend sovereign jurisdictions. Hopes of redirecting the financial assets created within this system, by means of modest reforms, towards objectives of social justice and ecological sustainability may prove illusory. To achieve such objectives arguably requires the constitution of a global normative order guided by public and political decision-making. The achievement of a publicly accountable constitutional order that is superordinate to the financial system might be regarded as a revolutionary transformation.

The Consolation of Philosophy Garland Publishing

The margravian court astronomer Simon Marius, was involved in all of the new observations made with the recently invented telescope in the early part of the seventeenth century. He also discovered the Moons of Jupiter in January 1610, but lost the priority dispute with Galileo Galilei, because he missed to publish his findings in a timely manner. The history of astronomy neglected Marius for a long time, finding only the apologists for the Copernican system worthy of attention. In contrast the papers presented on the occasion of the Simon Marius Anniversary Conference 2014, and collected in this volume, demonstrate that it is just this struggle to find the correct astronomical system that makes him particularly interesting. His research into comets, sunspots, the Moons of Jupiter and the phases of Venus led him to abandon the Ptolemaic system and adopt the Tyconic one. He could not take the final step to heliocentricity but his rejection was based on empirical arguments of his time. This volume presents a translation of the main work of Marius and shows the current state of historical research on Marius.

Globally acclaimed miminalist architect, John Pawson, celebrates colors through 320 inspiring photographs. "Pawson is a lot more than just an architect; he's also handy with a camera and has a good eye for what makes a nice picture." —Monocle Globally acclaimed architectural designer John Pawson takes you on a multi-colored journey across the world through a carefully curated sequence of 320 images, a celebration of color from one of the most unexpected sources. His architecture might be known for its limited color palette – primarily white – but his photographs tell another story. Pawson is always taking photographs of patterns, details, textures, and spatial arrangements that often inform his work, which includes the new Design Museum in London and Calvin Klein retail stores.

The Struwwelpeter painting book Oxford University Press, USA

Today, the reality we know can be recorded and reproduced true to reality using technical processes. Space and time are recreated virtually as a copy in artificial reality. However, the reproduction of virtual reality is not limited to a mere copy of what exists. A visitor to the virtual space does not have to be content with the pixelated image of the old familiar, but can encounter unreal phenomena in the illusory world that never existed in real life or are even physically impossible. This enables an expansion of the recorded reality and allows the perception of surprisingly new perspectives. A perspective denotes the perception of a fact from a certain point of view and corresponds to the way of looking at things. But a perspective is also the observation of a scene from a viewing position. From different perspectives the illusion of reality arises during the reproduction by observation. This

vision is not based on imagination or hallucination, but is the basic function of virtual reality. This book describes the concepts, systems, and technologies used to create virtual reality from its ancient beginnings to the present, and provides a glimpse into a possible future. This book is a translation of the original German 1st edition Grundlagen der virtuellen Realität by Armin Grasnack, published by Springer-Verlag GmbH Germany, part of Springer Nature in 2020. The translation was done with the help of artificial intelligence (machine translation by the service DeepL.com). A subsequent human revision was done primarily in terms of content, so that the book will read stylistically differently from a conventional translation. Springer Nature works continuously to further the development of tools for the production of books and on the related technologies to support the authors.

“ A beautiful love letter to the very first processed food. Any book that contains a section on the joys of crisp sandwiches gets my vote. ” — Jay Rayner “ What an absolutely beautiful book... Pages of love letters to bread; everything it is, does, and how very special it is as a part of our food vocabulary. Wonderful words by Tim make this book perfect bedtime reading for any foodie but, more importantly, anyone who has ever eaten bread. ” — Tom Kerridge

“ A book by Tim Hayward is eagerly anticipated. When the subject is his love of bread, its lore and great many uses, his sound, good sense noting the myriad ways in which bread enhances daily life makes this book a most inspiring read. He illuminates each page with his thoughts and love of food in the most endearing of voices. ” — Jeremy Lee “ A wonderful book and impossible to read without a smile on your face. ” — Rob Long A loaf of bread means different things to different people. It's at once the centerpiece of the family table, it's the source of the demon gluten, the reassuring heft of an artisan sourdough, or the fluffy comfort of a white sandwich loaf — it's the best thing since... well, sliced bread. This is NOT a book about how to make bread. No kneading, no rising, no baking. Loaf Story is a food book about bread — not just the role it plays in people ' s lives all over the world, but how it has been adapted and used in so many dishes. It is food of poverty and yet now we routinely pay big money for an artisanal loaf. Why does it have such a hold on us? From the British and American white sliced loaf to the French baguette, Scandinavian rye, and the uber-trendy Japanese katsu sando, the cultural significance of the loaf is manifold. With recipes for 60 dishes that can be made on bread, in bread and with bread, including a look at the myriad uses for breadcrumbs, croutons, and hollowed-out loaves, as well as the hallowed doorstep sandwich and a classic BLT, Loaf Story is a heart-warming celebration of the staff of life.
