Pinterest is a social media site that enables users to create online pinboards of compelling images they find online by "pinning" the images and curating them into various categories. It has exploded into American consciousness with big media attention and exponential growth-most notably reaching 10 million unique monthly visitors more quickly than any social media site in history. The vast majority of early devotees have been women of higher income between the ages of 25 and 49, and the images they pin frequently fall into the categories of clothing, crafts, food, and home décor. This represents a significant opportunity for companies and brands whose products are targeted to this market; however, Pinterest has value far beyond its initial popular use. Companies large and small are hearing the hype and hoping to get an early start with a site that shows signs of continued growth and influence. The Complete Idiot's Guide® to Pinterest Marketing helps small business owners as well as marketing experts at larger companies get on the Pinterest bandwagon and learn how to use this exciting new phenomenon to increase online exposure for their products, strengthen their online presence, and connect with customers in a place where they are now flocking. In it, readers learn how to: - Use the basic features of Pinterest, including setting up an account, creating boards, and pinning images - Develop a Pinterest marketing strategy and integrate it with other online and offline presences - Project a brand voice onto Pinterest through strategic pinning and writing compelling pin copy - Create pins that get repinned - Grow a following organically and understand the importance of whom a brand follows - Engage an audience through contests, collaborative boards, and more - Determine who in the organization will pin, or whether to outsource it - Gauge and quantify the success of a brand's marketing efforts on Pinterest Shaolin Qi Gong Routledge

A Sudden, Fearful Death John Hunt Publishing
The sweetness of music is something that has puzzled Christian theologians for centuries. In this study, Luther's theology of music is approached from the point of view of pleasure. It examines the significance of joy, beauty and pleasure in relationship with music and Luther's theology. The notion of music as the supreme gift of God requires also a discussion about the idea of 'gift'. Music opens up new perspectives into Luther's thinking. Luther has seldom been reckoned among aesthetic theologians. Nevertheless, Luther has a peculiar view on beauty, understanding faith as a kind of aesthetic contemplation.

The author offers concise and many faceted guide to the world of incense burning rituals, as well as descriptions of the 81 incense substances comprising its core. Incense burning of the aromatic plant substances described focuses on spiritual and also magical ceremonies. A direct experience of fragrances may be so intense that, as the smoke unfolds, time seems to stand still. Fire - as a source of transformation is a frequently used symbol. For every type of crossing into new dimensions of perception it is the essential energetic catalyst, as it is for the fragrant messages still enveloped in their material form. Succumbing to its power, they emerge to

beguile our senses. Just as there are heavenly messengers who send their vibrations to earth, plants also send their fragrant messages from the kingdom of nature into higher realms. Each description of an individual plan includes a depiction of its fragrance message and practical advice for burning it as incense.

Khirbet Qeiyafa in the Shephelah Walter de Gruyter GmbH & Co KG
Excavations at the early Iron age site of Khirbet Qeiyafa (Israel), directed from 2007 to 2011 by Yosef Garfinkel and Saar Ganor under the auspices of the Hebrew University of Jerusalem and the Israel Antiquities Authority, have attracted considerable scholarly and media attention since the very first season, when the discovery of an inscribed ostrakon sparked controversies over the site's historical significance and nature. Located at the entrance of the Elah Valley, protected by a casemate wall and two monumental gateways, the settlement of Qeiyafa existed for barely half a century. Its dating and the correlation of the archaeological evidence with the regional history, not least the rise of an early Judahite monarchy, have become matters of intense academic debate. Resulting from a colloquium of the Swiss Society of Ancient Near Eastern Studies, this volume offers a condensed report by main excavator Yosef Garfinkel as well as several in-depth studies on archaeological, historical, epigraphical, iconographical and biblical issues.

Modern technology has changed the way we live, work, play, communicate, fight, love, and die. Yet few works have systematically explored these changes in light of their implications for individual and social welfare. How can we conceptualize and evaluate the influence of technology on human well-being? Bringing together scholars from a cross-section of disciplines, this volume combines an empirical investigation of technology and its social, psychological, and political effects, and a philosophical analysis and evaluation of the implications of such effects.

A compilation of expressions, questions and answers that came about in response to Leo's highly praised first book *Awakening to the*

Dream. Leo writes with characteristic insight and uses metaphor to illuminate the paradoxical and apparently confusing nature of non-duality in other spiritual traditions and he weaves these together with his own direct path to present clear pointers to contemporary seekers. An appropriately chosen quotation taken from various sources appears at the end of each short chapter. Also included at the end of the book is the full text of the Hsin-hsin Ming by the third Chan patriarch Seng-ts'an. "The words in this book repeatedly point to the essence which knows the reading as it takes place. Rather than an encouragement to follow a lengthy path, it is an invitation to step off the path. It does not point to 'your' awareness, but to Awareness itself in which the idea of 'you' appears. It does not point to 'your' beingness, but to the undeniable Beingness that appears as you."

Inspector William Monk is ordered to investigate in a manner that will give the least possible pain to the influential family. But Monk, brilliant and ambitious, is handicapped by lingering traces of amnesia and by the craven ineptitude of his supervisor, who would like nothing better than to see Monk fail. With the help of nurse Hester Latterly, a progressive young woman who served with Florence Nightingale in the Crimea, Monk gropes warily through the silence and shadows that obscure the case, knowing that with each step he comes closer to the appalling truth.

The discovery of the Dead Sea Scrolls more than sixty years ago has revealed a wealth of literary compositions which rework the Hebrew Bible in various ways. This genre seems to have been a popular literary form in ancient Judaism literature. However, the Qumran texts of this type are particularly interesting for they offer for the first time a large sample of such compositions in their original languages, Hebrew and Aramaic. Since the rewritten Bible texts do not use the particular style and nomenclature specific to the literature produced by the Qumran community. Many of these texts are unknown from any other sources, and have been published only during the last two decades. They therefore became the object of intense scholarly study. However, most the attention has been directed to the longer specimens, such as the Hebrew Book of Jubilees and the Aramaic Genesis Apocryphon. The present volume addresses the less known and poorly studied pieces, a group of eleven small Hebrew texts that rework the Hebrew Bible. It provides fresh editions, translations and detailed commentaries for each one. The volume thus places these

texts within the larger context of the Qumran library, aiming at completing the data about the rewritten Bible.

As water scarcities increase, nations throughout the world are in search of better institutions to manage water resources. India has been making substantial efforts to develop its water management systems since independence and significant increases in irrigated agriculture have taken place through both public and private initiatives. However, scarcities are increasing and major problems presently confront the management of water resources and irrigated agriculture. Resolving these problems is crucial for the future. The main purpose of this book is to provide a new approach for the analysis and design of water institutions that govern the use and development of water resources, particularly for agriculture which is the largest user. Drawing on the theory of New Institutional Economics and comparisons with Australia (as a developed country) and other less developed nations in Africa and Asia, the authors present original empirical data from three Indian states. Detailed analysis of these data is used to identify and recommend attributes and features of water management institutions that are conducive to effective resource management, its long-term success, and its best contribution to development.
